HORNBY

LOCOMOTIVES AND POWER SUPPLY

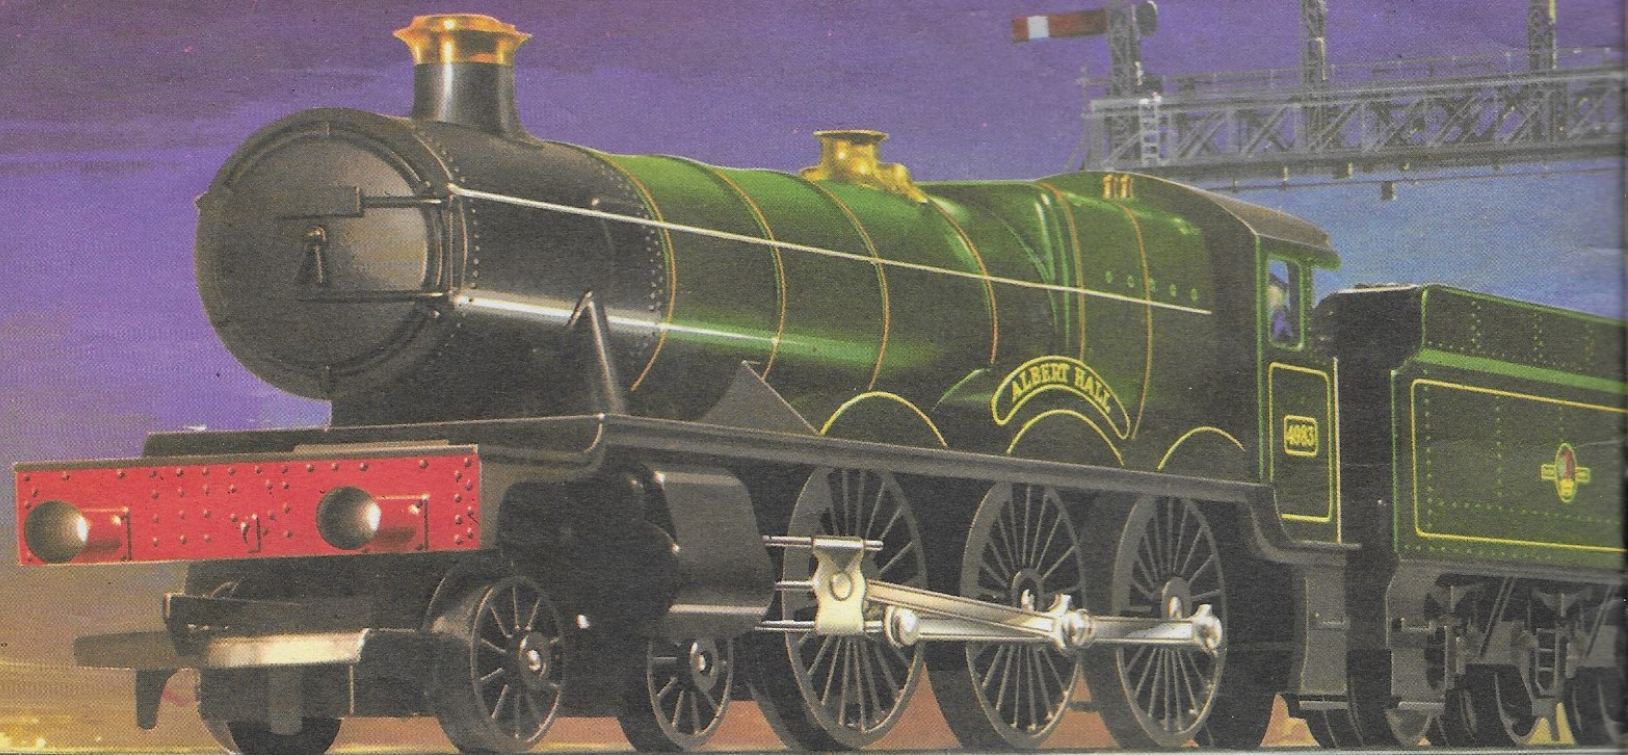

Every Locomotive is built with the finest materials and superb craftsmanship and is triple tested before release. Electrically operated Locomotives work from 12 Volts Direct Current. The best source of this supply is a Mains Power Controller. There are many sizes available so consult your dealer about your requirement which will depend on the extent to which you plan to build up your layout. Trains may also be run from Dry Batteries.

ROLLING STOCK

Our range of Passenger and Goods Rolling Stock enables you to run a model of nearly every type of train you would see in real life. Tapered axle bearings ensure that the running performance of each model upholds the quality of its appearance.

STATIONS

There are now twin station systems—the Tri-ang and the Hornby. You can start with a simple wayside halt in either system and build up to a main line junction or terminus and every part of the original halt is still needed.

R.759 4-6-0 Western Region Hall Class Locomotive 'Albert Hall' and **R.760** Tender. Exclusive Magnadhesion works through rear pair of driving wheels. Complete with Driver and Fireman.

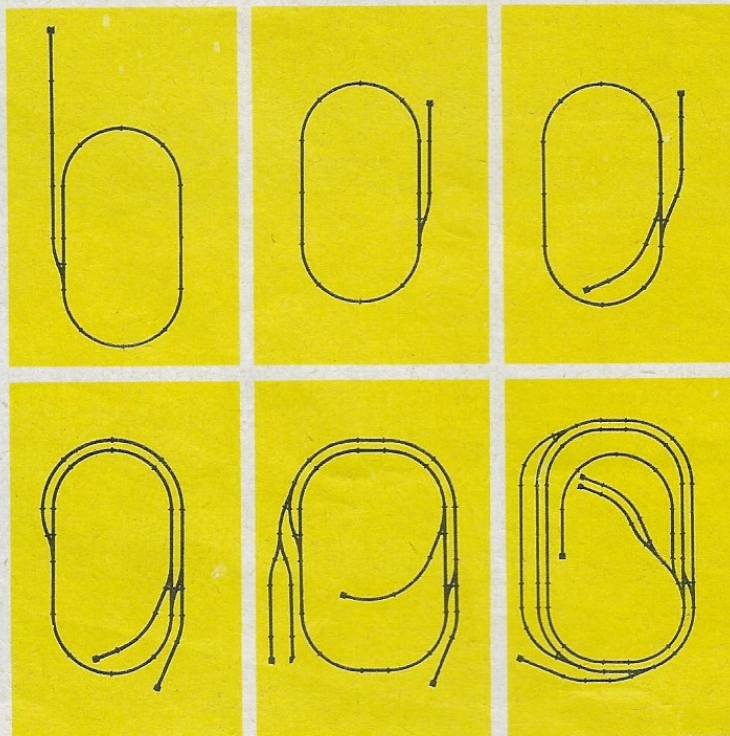

New Locomotives....

Model Railways...

TRACK

Here are some ways in which you can build up on the Track included in a Train Set. Super-4 Track is built with solid steel rails mounted into an impact resisting plastic base which is extremely strong. Track sections fit together easily and the fifteen different sections permit the construction of almost any formation.

The electric supply from the Power Controller plugs into the track at any position and automatically follows the route selected by the way you change the points.

SYMBOLS USED IN CATALOGUE

MAGNADHESION

This means **MAGNETS** are built into Locomotive chassis to make the steel tyred driving wheels **ADHERE** to the steel track and....

GIVE GREATER GRIP.

SYNCHROSMOKE

A tiny electric element causes special 'smoke oil' to vaporise and make smoke. A piston synchronized with the revolutions of the driving wheels ejects the smoke in realistic puffs.

LIGHTS

Locomotive headlights pick up current from the track. Colour light signals and station lights are wired up to a Power Controller and the signals operate through a special lever—just like real.

CLIP-FIT

Tri-ang Hornby Super 4 Track has an 'exclusive slot' into which many trackside accessories can be clip-fitted thus avoiding the need to nail or screw them into position.

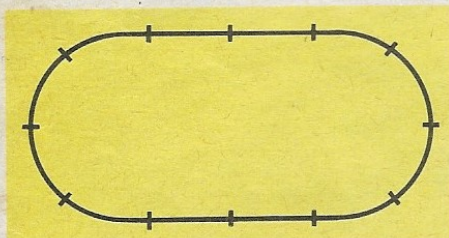

To be released in 1966.

R.758 Hymek B-B Diesel Hydraulic Locomotive. Authentic B.R. Livery emphasises the attractive lines of this modern workhorse.

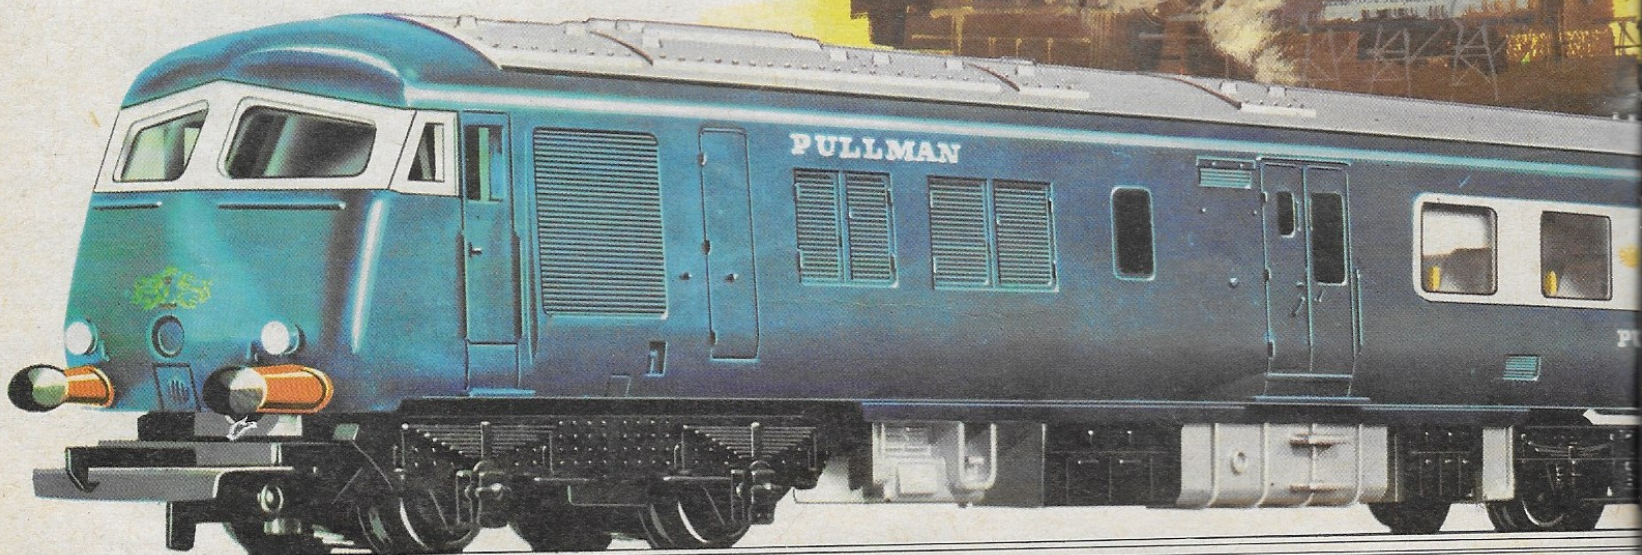

Passenger Train Sets

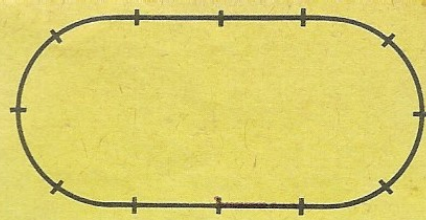

RS.52 'BLUE PULLMAN' TRAIN SET. Contains Diesel Pullman Motor Car Pullman Parlour Car and Pullman Motor Car (non-powered) with Large Oval of Track and Uncoupler. Pullmans are fully fitted with seats, tables and lamp standards.

THE BLUE PULLMAN

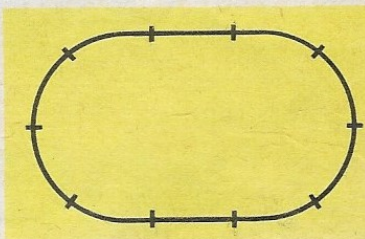

RS.9 'INTER-CITY EXPRESS' TRAIN SET. Contains English Electric Co-Co Diesel Locomotive with Magnadhesion, two 1st Class Pullmans, Pullman Brake 2nd Car and Large Oval of Track with Uncoupler.

The MIDLANDER

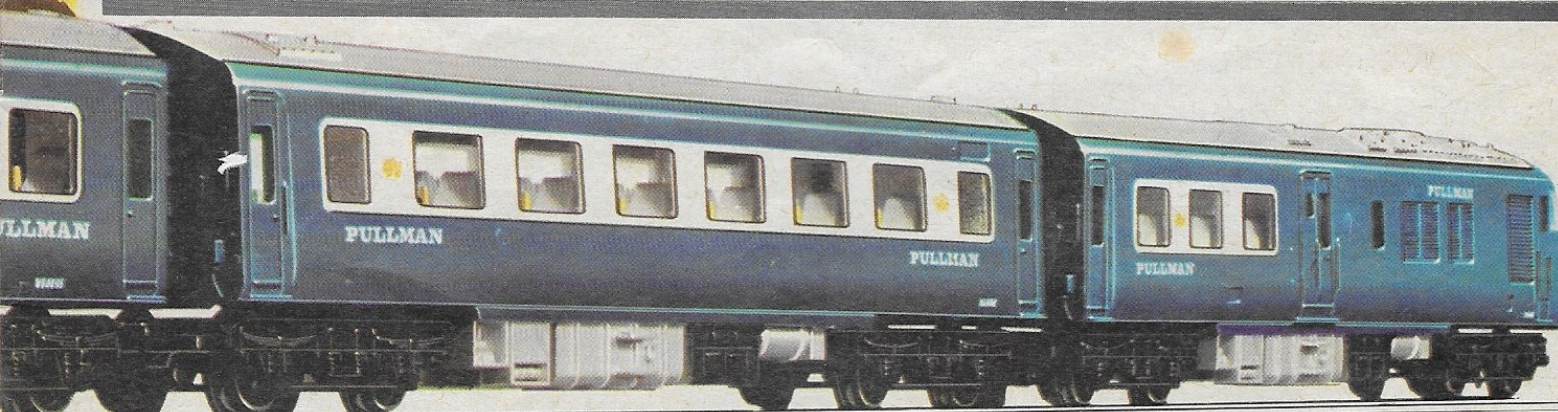

RS.8 'THE MIDLANDER' TRAIN SET. Maroon liveried 0-6-0 Locomotive and Tender with Composite and Brake 2nd Coaches. Oval of Track with Uncoupler.

STEPHENSONS ROCKET

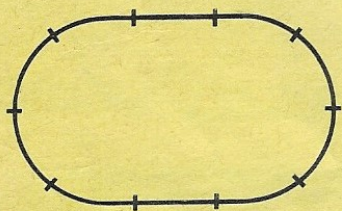

R.346 'STEPHENSONS ROCKET' TRAIN. Fully detailed Locomotive has Crew and moving connecting rods. Tender and one Coach included in Train Pack. Track not included.

Tri-ang
Registered Trade Mark
HORNBY

Goods Train Sets

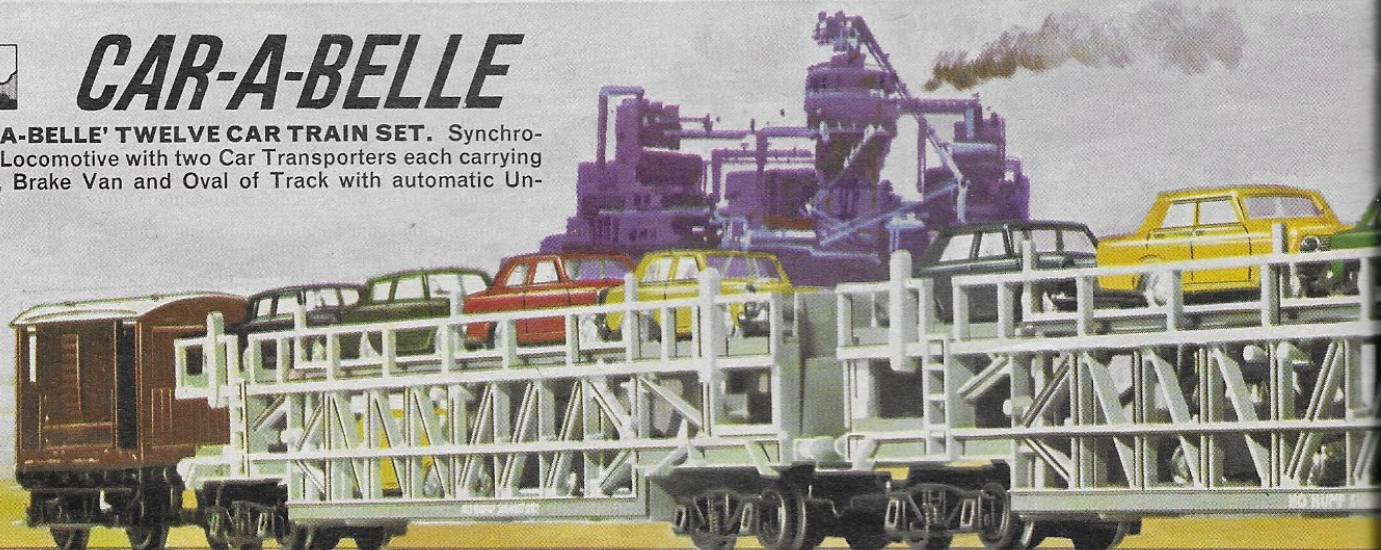

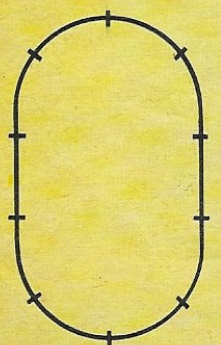

THE 'PICK-UP'

RS.24 'PICK-UP' TRAIN SET. Consists of blue-liveried 0-4-0 'Nellie' Locomotive, Ice-blue Fish Van, Open Wagon and Brake Van. Oval Track with automatic Uncoupler.

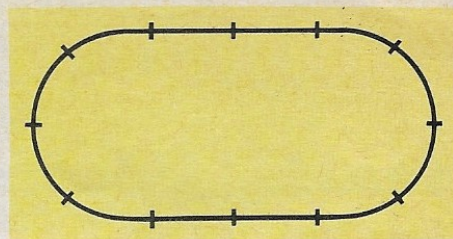

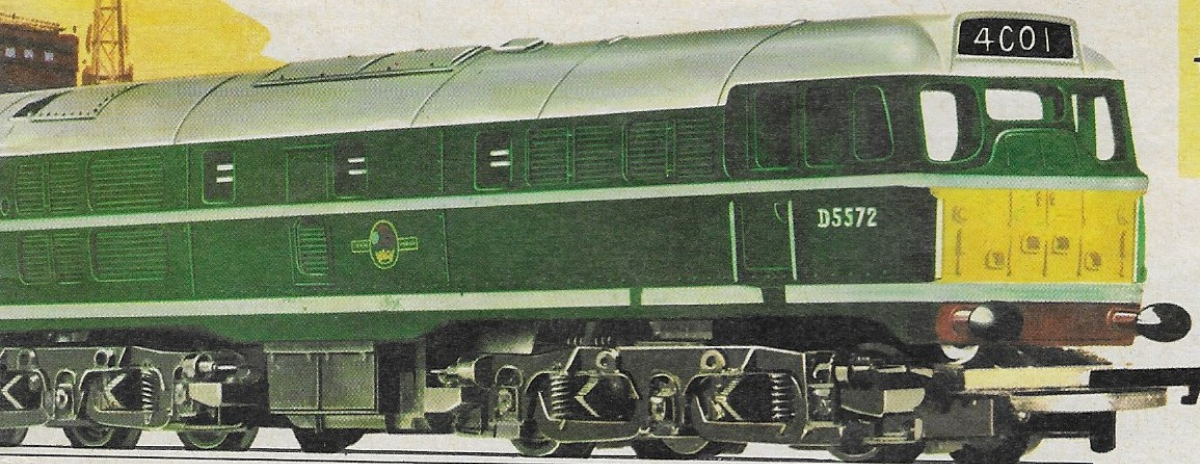

CAR-A-BELLE

RS.62 'CAR-A-BELLE' TWELVE CAR TRAIN SET. Synchro-smoking 0-6-0 Locomotive with two Car Transporters each carrying 6 MINIX Cars, Brake Van and Oval of Track with automatic Uncoupler.

THE FREIGHTMASTER

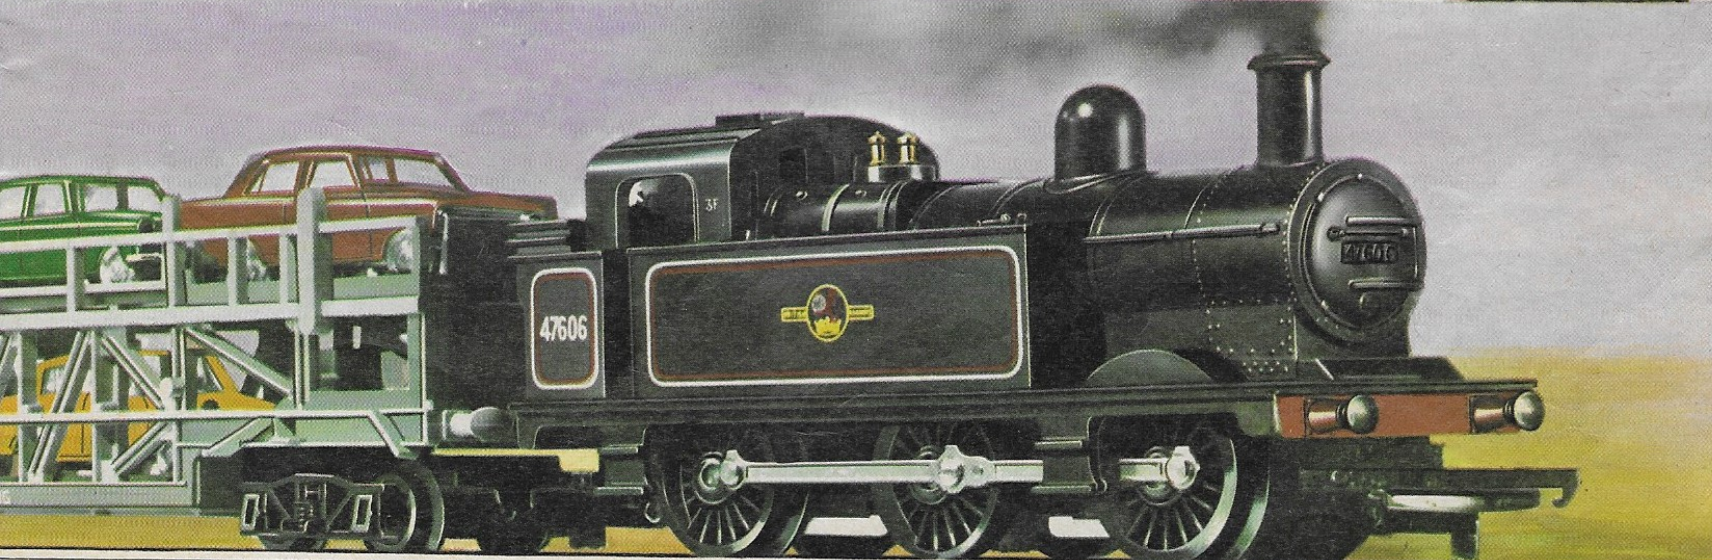

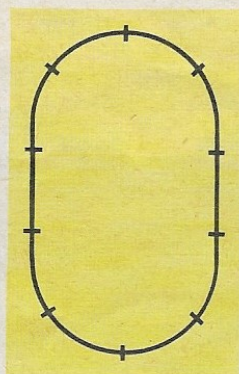

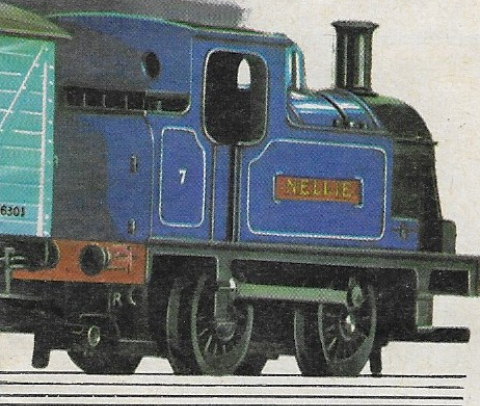

7

RS.51 'FREIGHTMASTER' TRAIN SET. Heavy duty Diesel with SEVEN Trucks—Horse Box, Cattle Wagon, Milk Tanker, Tri-ang Container Wagon, 3 Containers Wagon, Drop-side Wagon and Brake Van. Large Oval of Track includes automatic uncoupling device.

The 'GOODS'

RS.11 'THE GOODS' TRAIN SET. Ready-to-Run. Red Locomotive 'Polly', Mineral Wagon, Flat Wagon with MINIX Car, Brake Van and Track Oval with Uncoupler. Comes complete with 12 Volt D.C. Power Controller fitted with speed and direction regulator, thermal automatic overload cut-out and resistance adjusting switch. Input 220/240 Volts A.C. 50 cycles only. (Not available for Australia.)

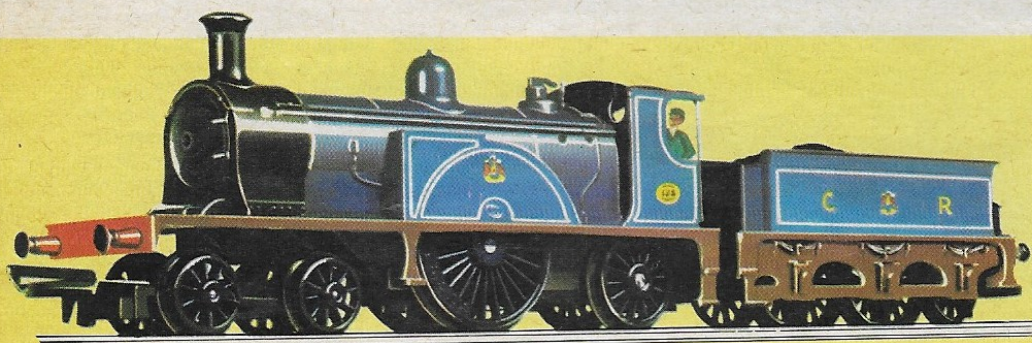

Tri-ang

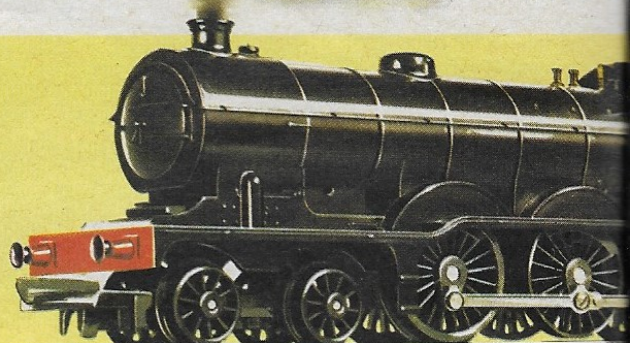

HORNBY

Steam Locomotives...

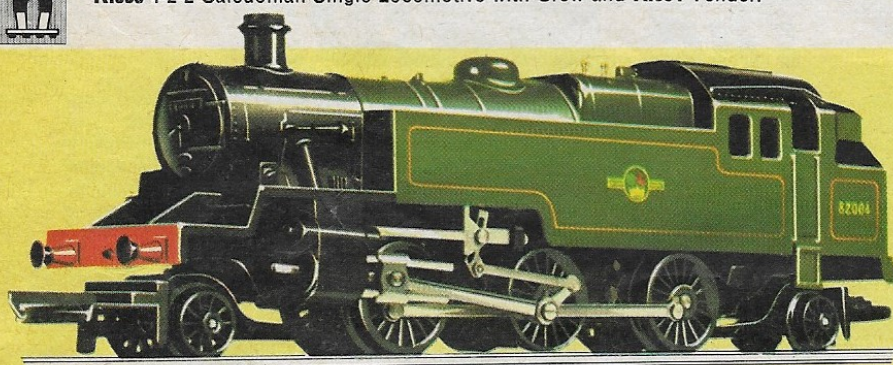

R.2235 4-6-2 West Country Class Locomotive 'Barnstaple' and Tender. Ex-Hornby Dublo model comes complete with Tri-ang Hornby Coupling Converter Wagon.

R.553 4-2-2 Caledonian Single Locomotive with Crew and **R.554** Tender.

R.150S 4-6-0 B12 Class Locomotive with

R.59 2-6-2 Class 3MT Tank Locomotive with Walschaerts Valve Gear.

R.355B 0-4-0 Industrial Locomotive 'Nellie'.

R.356S 4-6-2 Battle of Britain Class Locomotive 'Winston Churchill' with Crew and **R.38** Tender.

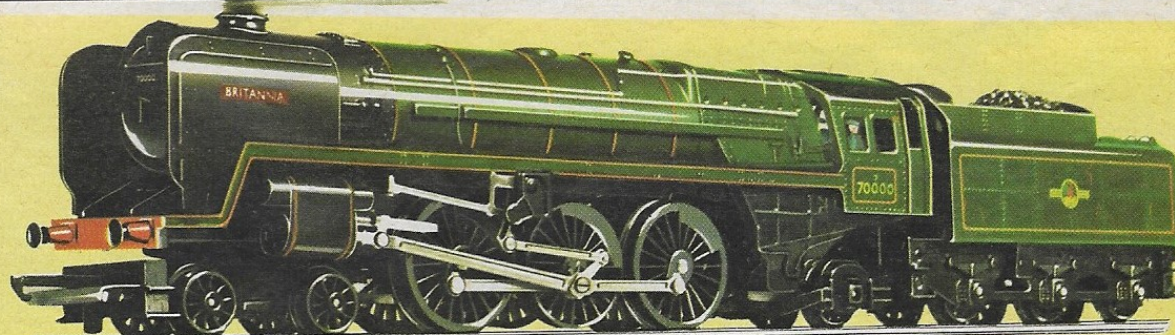

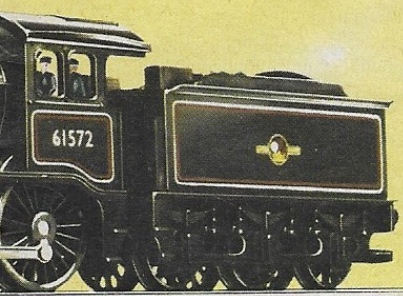

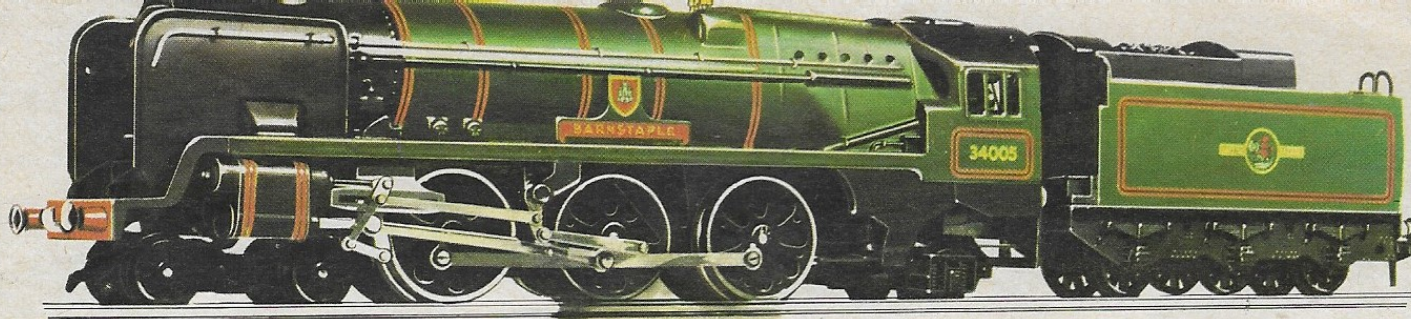

RT.521 Extra Capsule of Smoke Oil. Note. Each Locomotive fitted with Synchros smoke has a capsule of oil included.

CKD
COMPLETELY KNOCKED DOWN

R.386 CKD 'Princess Elizabeth' Locomotive with Crew and Tender. Over 40 parts for you to assemble into a model which will be identical to a factory finished one. Screwdriver included but no glueing, soldering or painting required. CKD means Completely Knocked Down.

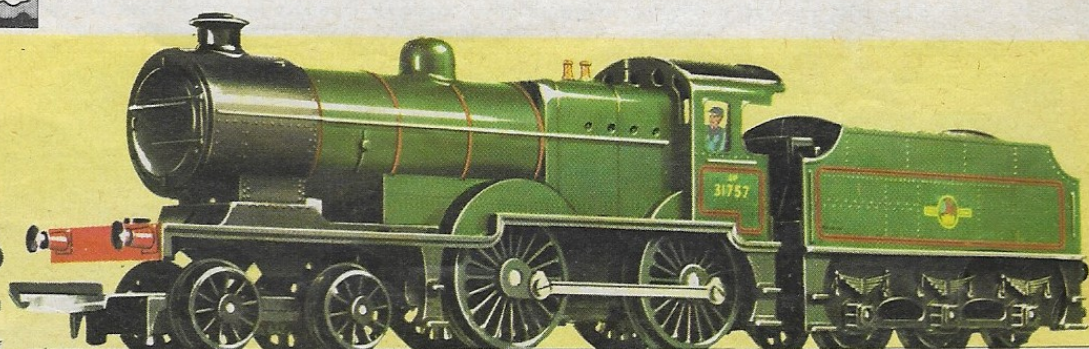

Crew and R.39 Tender.

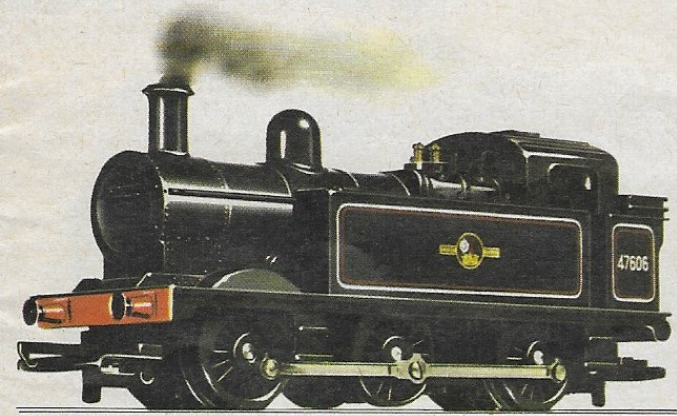

R.259S 4-6-2 Class 7P6F Locomotive 'Britannia' with Crew, Walschaerts Valve Gear and R.35 Tender.

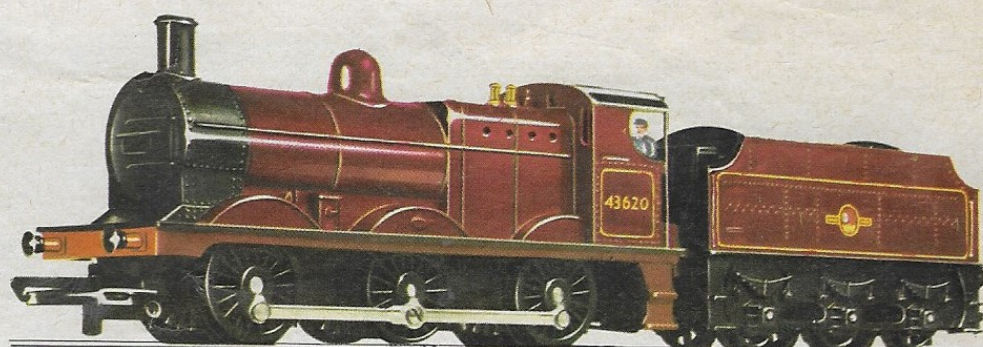

R.355R 0-4-0 Industrial Locomotive 'Polly'.

R.350 4-4-0 Class L1/3P Locomotive with Crew and R.36 Tender.

R.52S 0-6-0 Class 3F Tank Locomotive.

R.251 0-6-0 Class 3F Locomotive with Crew and R.33 Tender. Now in maroon livery.

R.413 Locomotive Crew.
Most Steam Locomotives with suitable footplates are now supplied complete with crew. Now you can get drivers and firemen for your older Locomotives.

GREATER GRIP
magnadhesion

Tri-ang Hornby's exclusive Magnetic Driving Wheels were developed for the Locomotives with only 2-wheel drive — the 'Caledonian' and 'Stephenson's Rocket'. They proved to be so effective that they are now fitted to a wide range of other Locomotives.

Tri-ang
Registered Trade Mark**HORNBY**

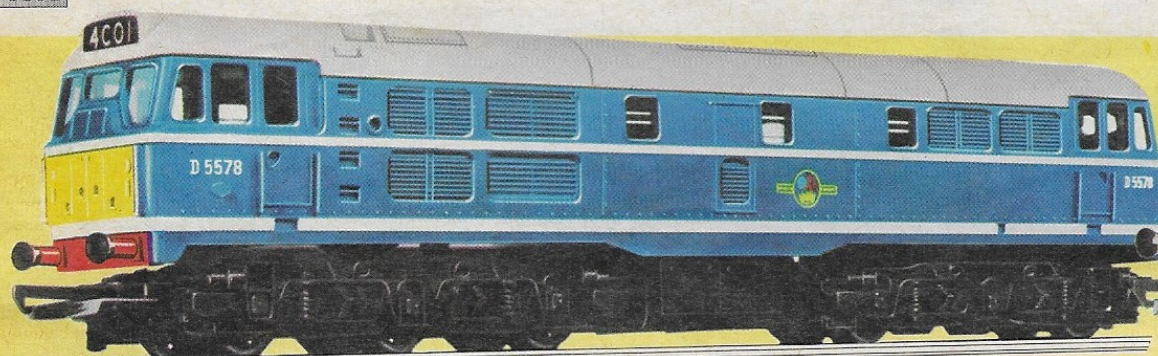

Diesel and Electric Locomotives

R.351 Co-Co Class EM2 Locomotive 'Electra' with working pantographs. Operates from the Track or, at the flick of a switch, from the Overhead Catenary System.

R.753 Bo-Bo Class E.3001 Locomotive with Catenary System.

R.357B A1A-A1A Brush Type 2 Diesel Electric Locomotive.

R.357G A1A-A1A Brush Type 2 Diesel Locomotive.

R.559 0-4-0 Diesel Locomotive.

R.253 0-4-0 Diesel Dock Shunter.

R.152 0-6-0 Diesel Shunting Locomotive.

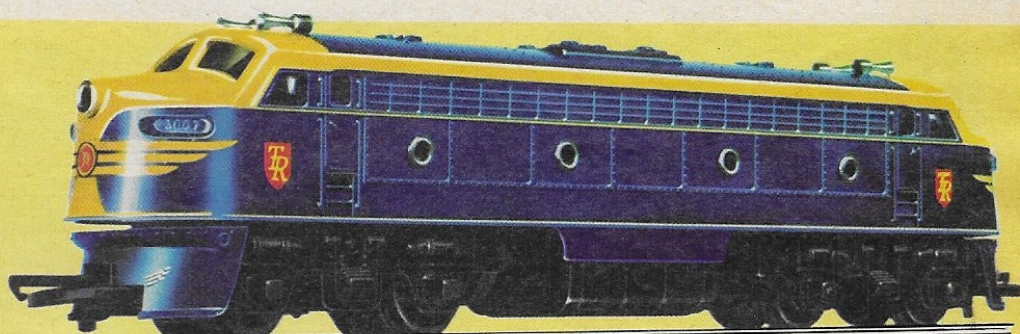

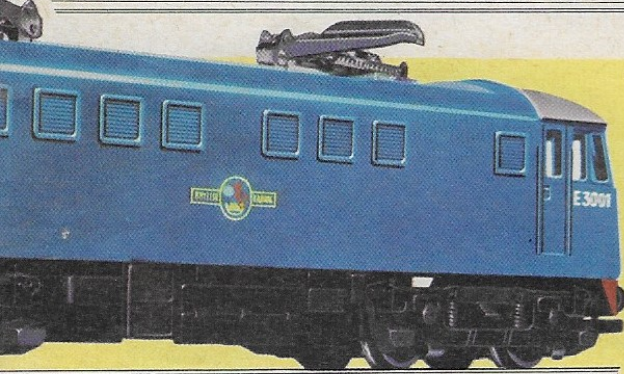

CKD
COMPLETELY KNOCKED DOWN

R.388 CKD EM2 Locomotive 'Electra'. Assembly Kit with over 50 finished parts. Absolutely complete including screwdriver. The model you build will be indistinguishable from a factory made one.

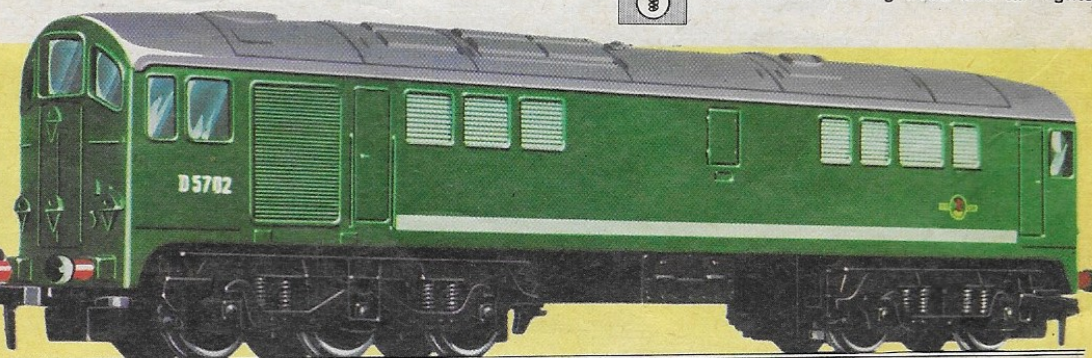

CKD (Completely Knocked Down) is a term used by the Motor Car industry when they export parts of a car to an overseas assembly plant.

working pantographs. Operates from the Track or the Overhead

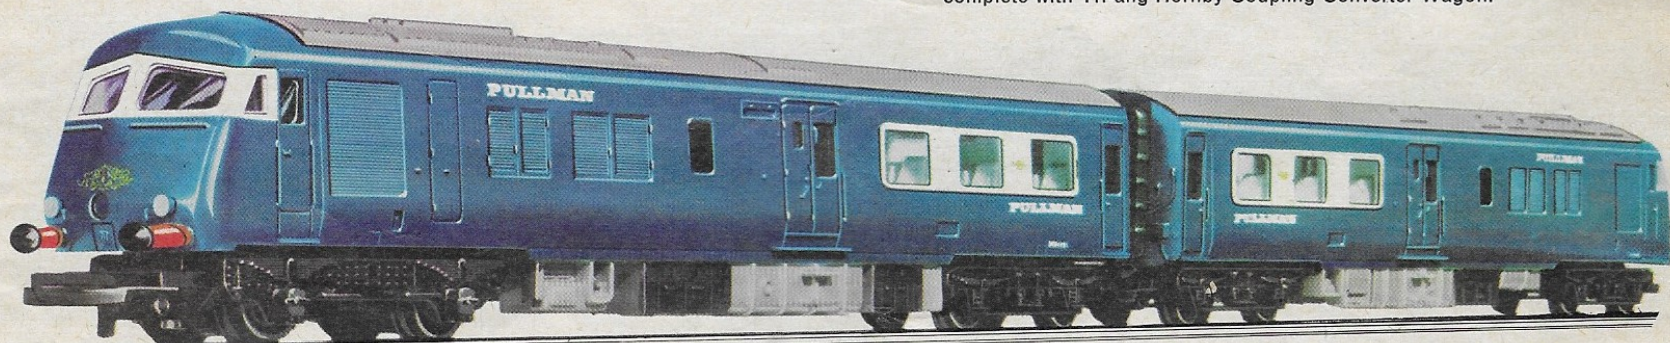

R.159 Bo-Bo Transcontinental Diesel Locomotive with working head and tail lights.

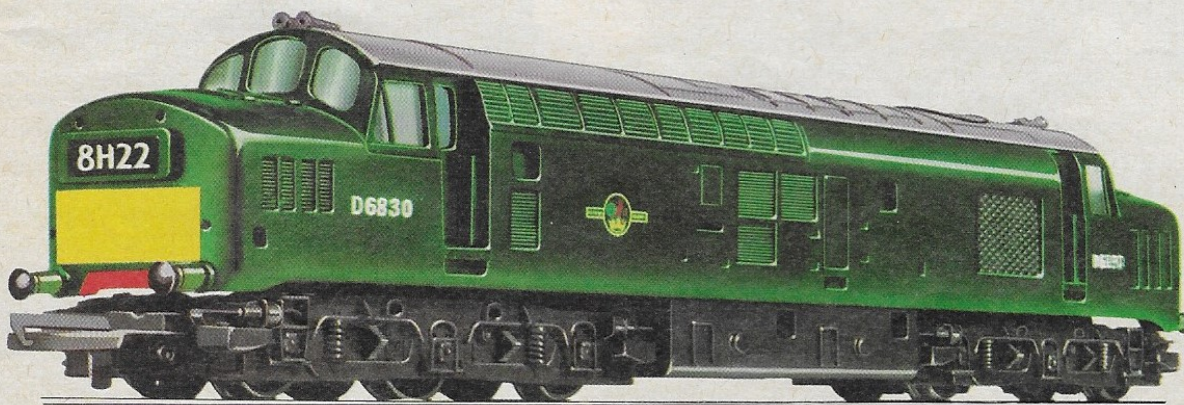

Electric Locomotive.

R.2233 Co-Bo Diesel Electric Locomotive. Ex-Hornby Dublo model comes complete with Tri-ang Hornby Coupling Converter Wagon.

R.555 Diesel Pullman Motor Car Type 2, with seating.

R.556 Diesel Pullman Motor Car Type 2, with seating. Non-powered.

R.281 Set of five Train Figures. Consists of Driver, Fireman, Motorman and 2 Guards.

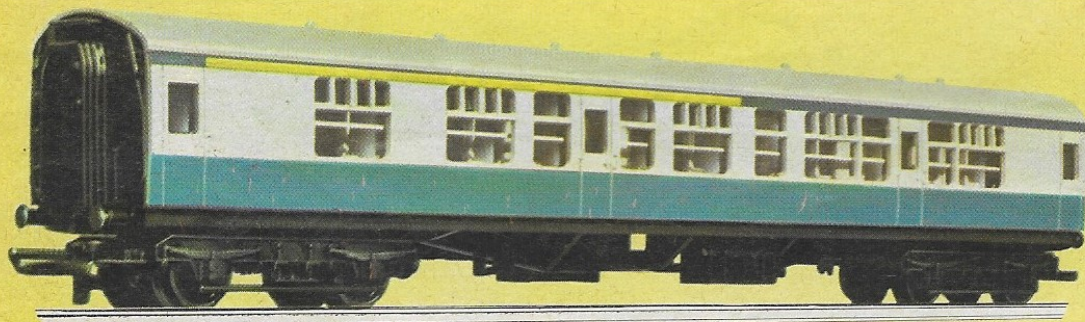

R.751 Co-Co English Electric Type 3 Diesel Electric Locomotive.

RT.297 Power-Clean Brush. Plugs into track to collect power to make driving wheels of Locomotives revolve. Brush then removes dirt from wheels. Simple to use and highly effective.

Tri-ang

HORNBY

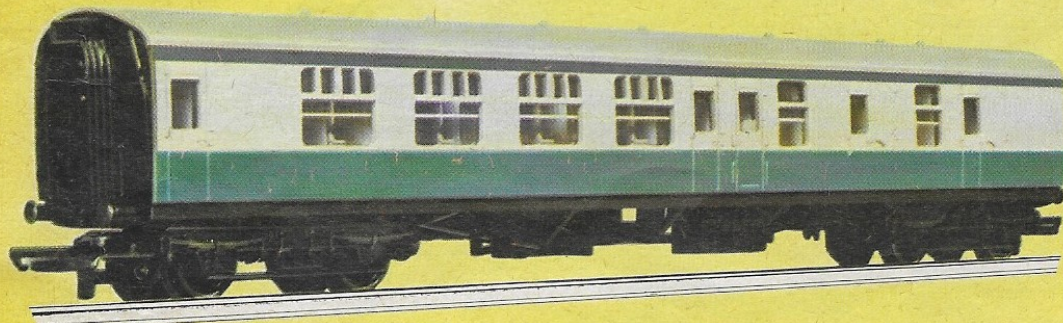

Passenger Coaches

R.727 Blue Composite Coach with interior fittings. This Coach has been re-coloured in line with British Rail's new stock for the Euston/Crewe/Manchester/Liverpool Electrification Project.

R.424 Maroon Buffet Car. With seating.

R.728 Blue Brake 2nd Coach. With seating.

R.623 Green Brake 2nd Coach. With seating.

R.422 Maroon Composite Coach. With seating.

R.624 Green Buffet Car. With seating.

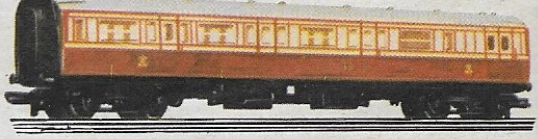

R.427 Caledonian Railway 1st/3rd Composite Coach.

R.339 Maroon 2nd Class Sleeping Car.

R.622 Green Composite Coach. With seating.

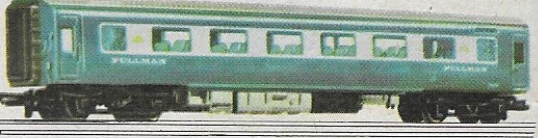

R.428 Caledonian Railway Brake/Composite Coach.

R.423 Maroon Brake 2nd Coach. With seating.

R.328 Pullman Brake 2nd Car. With seats, tables and imitation table lamps.

R.426 Blue Pullman Parlour Car Type 6. With seating, tables and imitation lamps.

R.425 Maroon Full Parcels Brake Coach.

R.334 Diesel Railcar Centre Unit. With seating.

R.620 Engineering Department Coach. New Olive Green Livery.

R.402 OPERATING ROYAL MAIL COACH SET. Pick-up Hook, Receiving Bin and Operating Ramps CLIP-FIT to Track. As Coach passes Hook a Mailbag is automatically loaded and remains in Coach until it reaches the Receiving Bin whereupon it is automatically ejected. A mechanical accessory—no wiring required.

R.228 Pullman 1st Class Car. Interior complete with seats, tables and imitation table lamps.

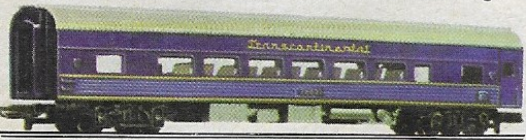

R.445 Transcontinental Observation Car. With seating.

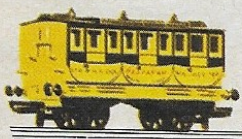

R.446 Transcontinental Baggage/Kitchen Car.

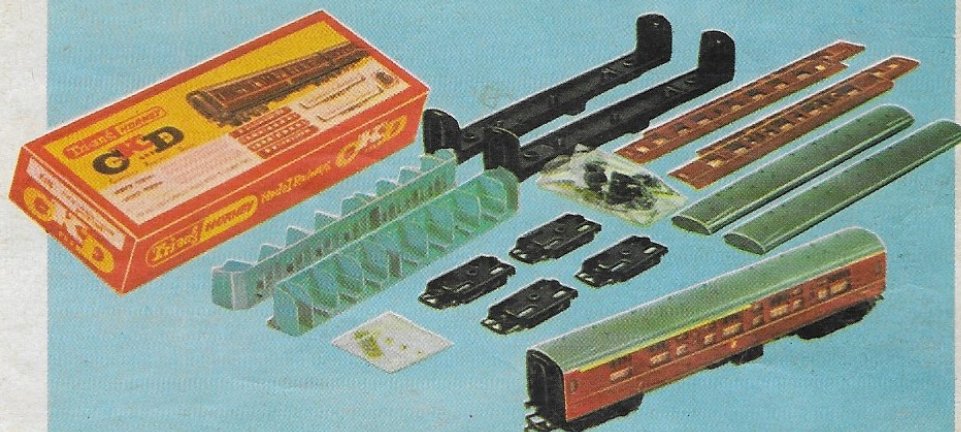

R.447 Transcontinental Diner. With internal fittings.

R.444 Transcontinental Coach. With seating.

R.621 Liverpool/Manchester Railway Coach. For adding to 'Stephenson's Rocket' Train.

CKD
COMPLETELY KNOCKED DOWN

R.382 Pair of CKD Maroon Composite Coaches.

R.383 Pair of CKD Maroon Brake 2nd Coaches.

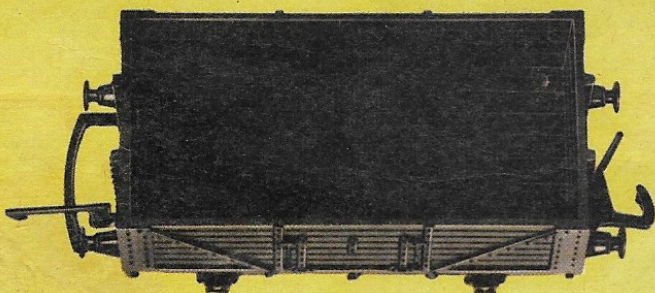

You assemble pre-coloured and decorated parts with a screwdriver and the results are identical to factory finished Coaches.

R.284 SET OF 5 COACH FIGURES. Attendant, 2 men and 2 women. The roofs of Coaches may be removed enabling figures to be placed inside.

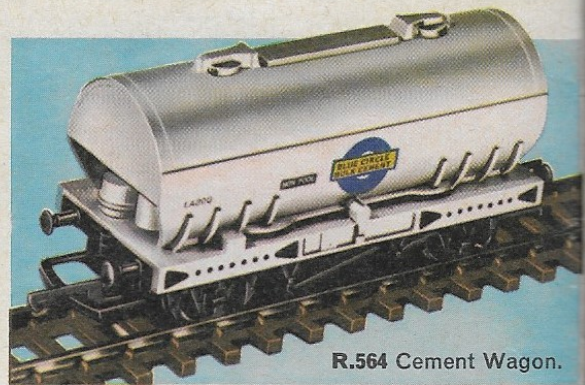

Wagons and Vans

Tri-ang Hornby
Tension-Lock
Coupling.

Hornby Dublo Coupling.

R.577 Tri-ang Hornby Converter Wagon. By having a Tri-ang Coupling one end and a Hornby Dublo Coupling the other, this Wagon can be used in Trains of mixed stock.

R.564 Cement Wagon.

R.10 Open Wagon.

R.11 Closed Van.

R.12 Shell B.P. Petrol Tank Wagon.

R.18 Cable Drum Wagon.

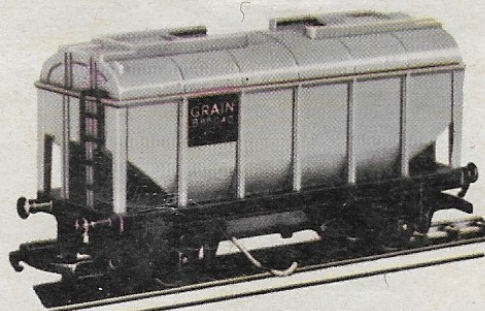

R.112 Goods Wagon with drop doors.

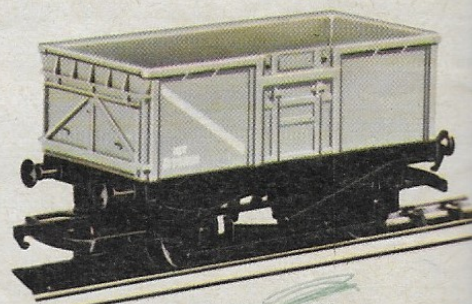

R.113 Goods Wagon with drop sides.

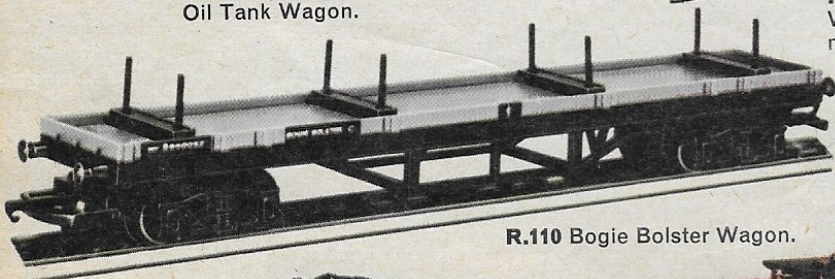

R.211 Shell Lubricating Oil Tank Wagon.

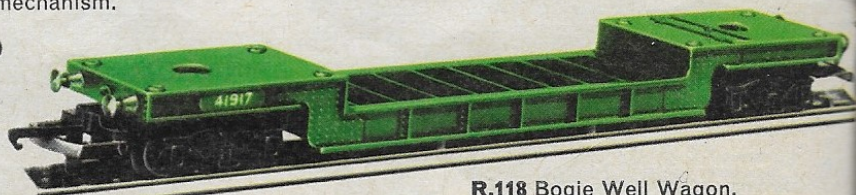

R.215 Bulk Grain Wagon. With Gravity unloading mechanism.

R.243 Mineral Wagon.

R.110 Bogie Bolster Wagon.

R.118 Bogie Well Wagon.

R.349 Bogie Chlorine Tank Wagon.

R.247 Bogie Caustic Tank Wagon.

R.219 Bogie Brick Wagon.

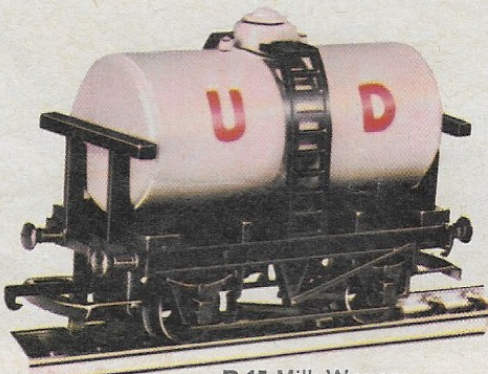

R.127 Operating Crane Truck with lifting, rising and rotating Jib.

R.342 Car Transporter. Supplied complete with 6 MINIX Cars, each having windows, plated grille, bumpers and chassis.

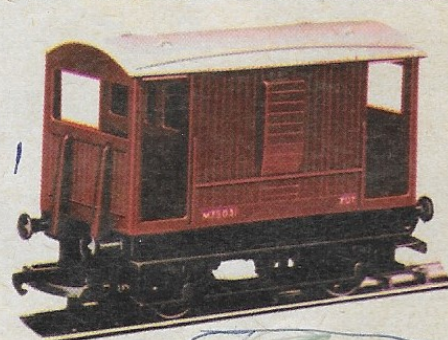

R.17C Flat Wagon with MINIX Car load.

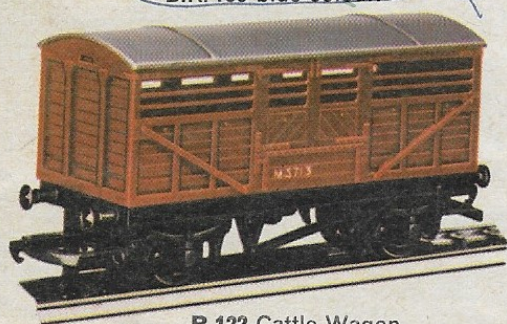

R.14 Fish Van. In new B.R. Ice-blue colour.

R.15 Milk Wagon.

R.16 E.R. Brake Van.

R.122 Cattle Wagon.

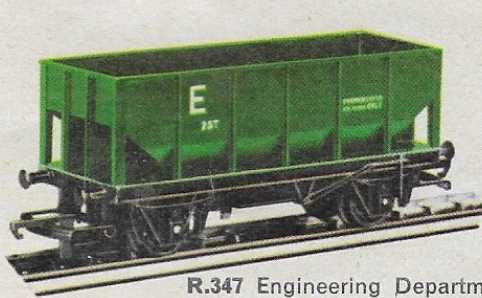

R.123 Horse Box.

R.124 W.R. Brake Van.

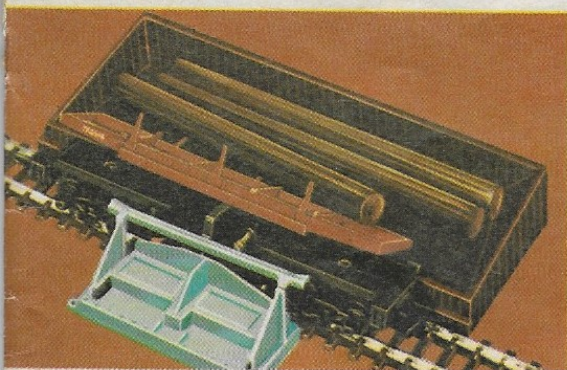

R.340 Three Containers Wagon.

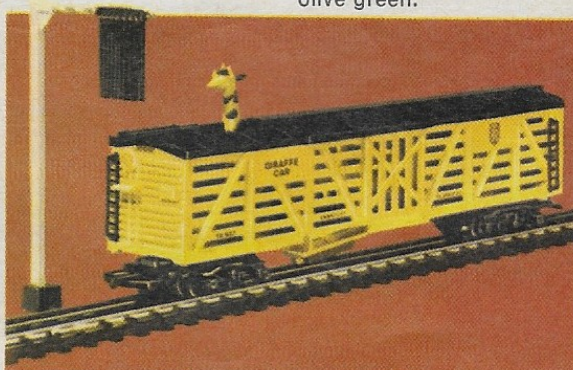

R.347 Engineering Department Wagon. With gravity unloading mechanism and in new B.R. olive green.

R.561 "Tri-ang" Container Wagon.

R.345 Side Tipping Flat Car. As Car passes Collection Bin the carrying frame automatically tilts and logs roll off into bin. Operating Ramp CLIP-FITS to Track.

R.348 Giraffe Car. Watch the way Georgie ducks to save hitting his head on bridges!

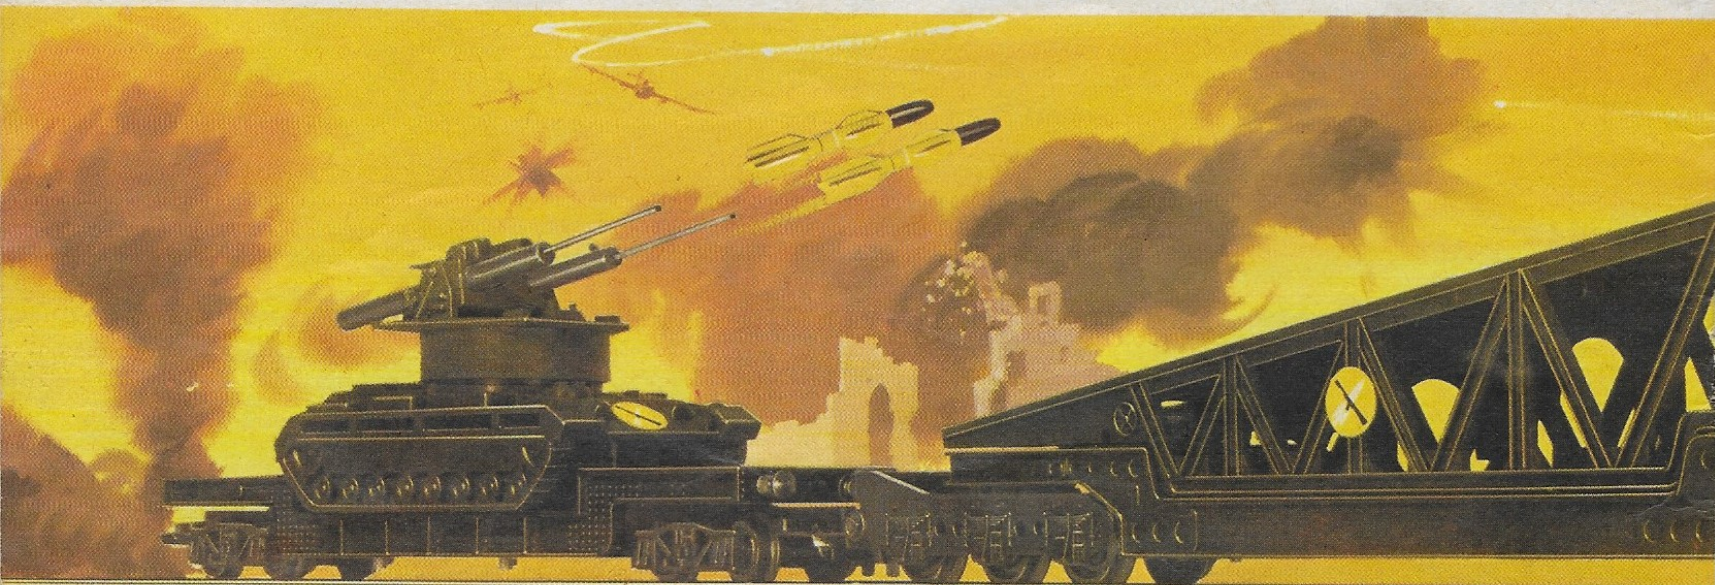

R.344 Track Cleaning Car in new B.R. Olive Green. Does not include cleaning fluid.

BATTLE SPACE

STRIKE FORCE 10

R.248 Medical Corps Ambulance Car.

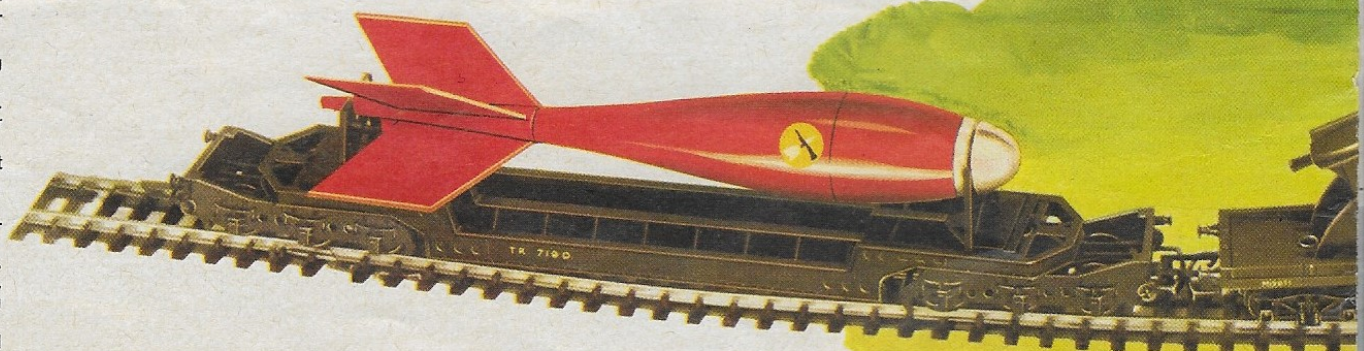

R.128 Battle Rescue Helicopter Car.
flies off as Car passes trackside trip

IMPORTANT

There is a Detachment of 7 Battle Space Commandos, illustrated on Page 18, with each of the following items:-

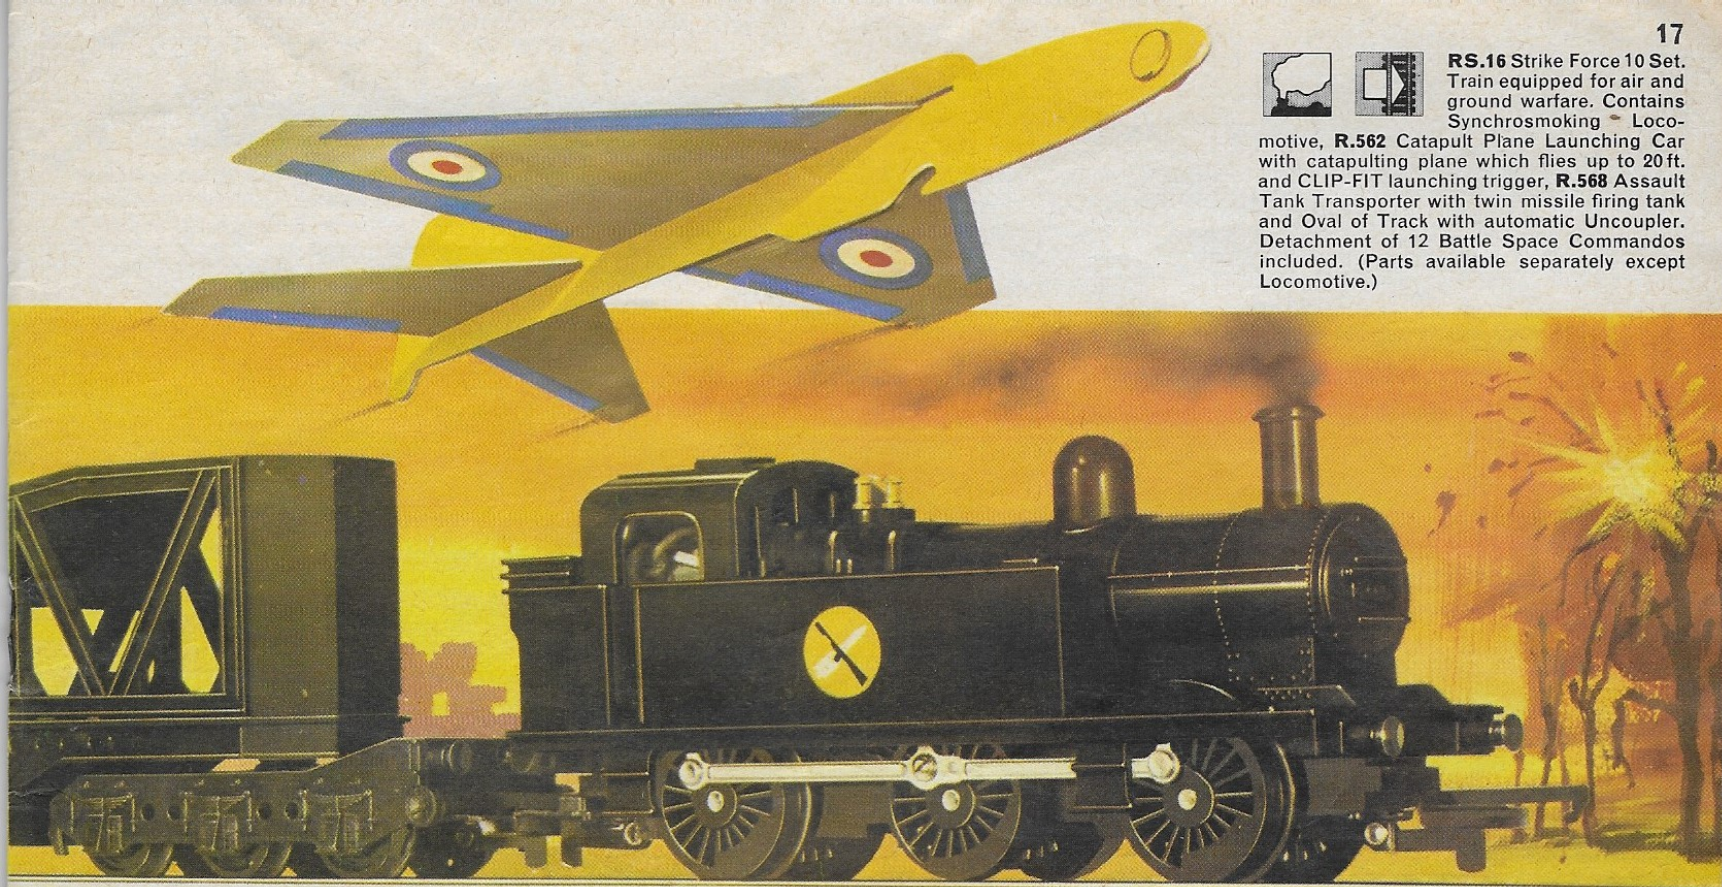

- R.562** Catapult Plane Launching Car.
- R.568** Assault Tank Transporter.
- R.128** Battle Rescue Helicopter Car.
- R.341** Anti-aircraft Searchlight Wagon.
- R.249** Exploding Car.
- R.239** Red Arrow Bomb Transporter.
- R.216** Tactical Rocket Launcher.
- R.343** Multiple Missile Launcher.
- R.566** Spy Satellite Launching Car, (see Page 18)
- R.567** Radar Tracking Command Car, (see Page 18)
- R.752** Battle Space Car, (see Page 18)

R.239 Red Arrow Bomb Transporter. Removable bomb can be charged with caps (not included) and explodes on hitting a hard surface.

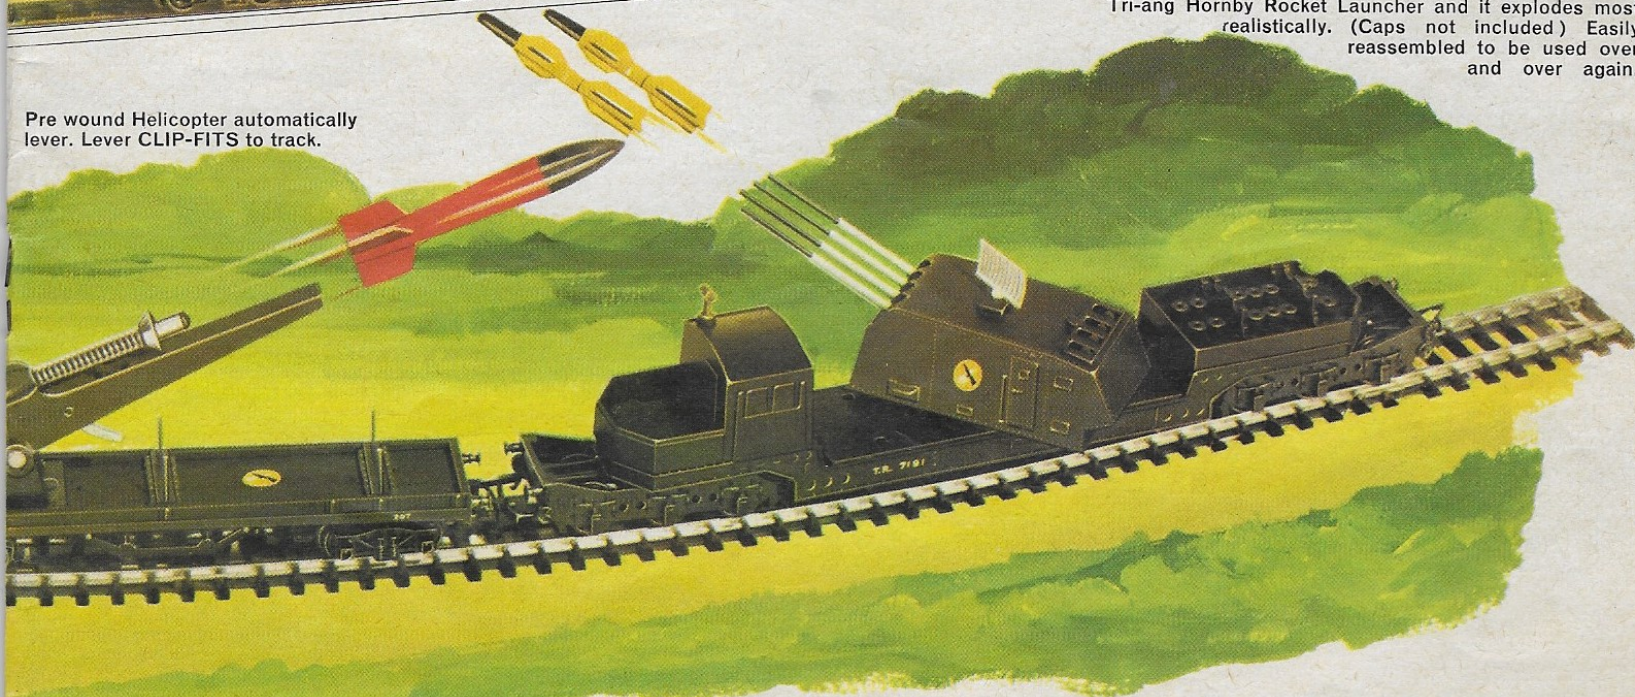

RS.16 Strike Force 10 Set. Train equipped for air and ground warfare. Contains Synchromoking - Locomotive, **R.562** Catapult Plane Launching Car with catapulting plane which flies up to 20 ft. and CLIP-FIT launching trigger, **R.568** Assault Tank Transporter with twin missile firing tank and Oval of Track with automatic Uncoupler. Detachment of 12 Battle Space Commandos included. (Parts available separately except Locomotive.)

R.341 Anti-aircraft Searchlight Wagon. Operating Searchlight picks up electric current from track.

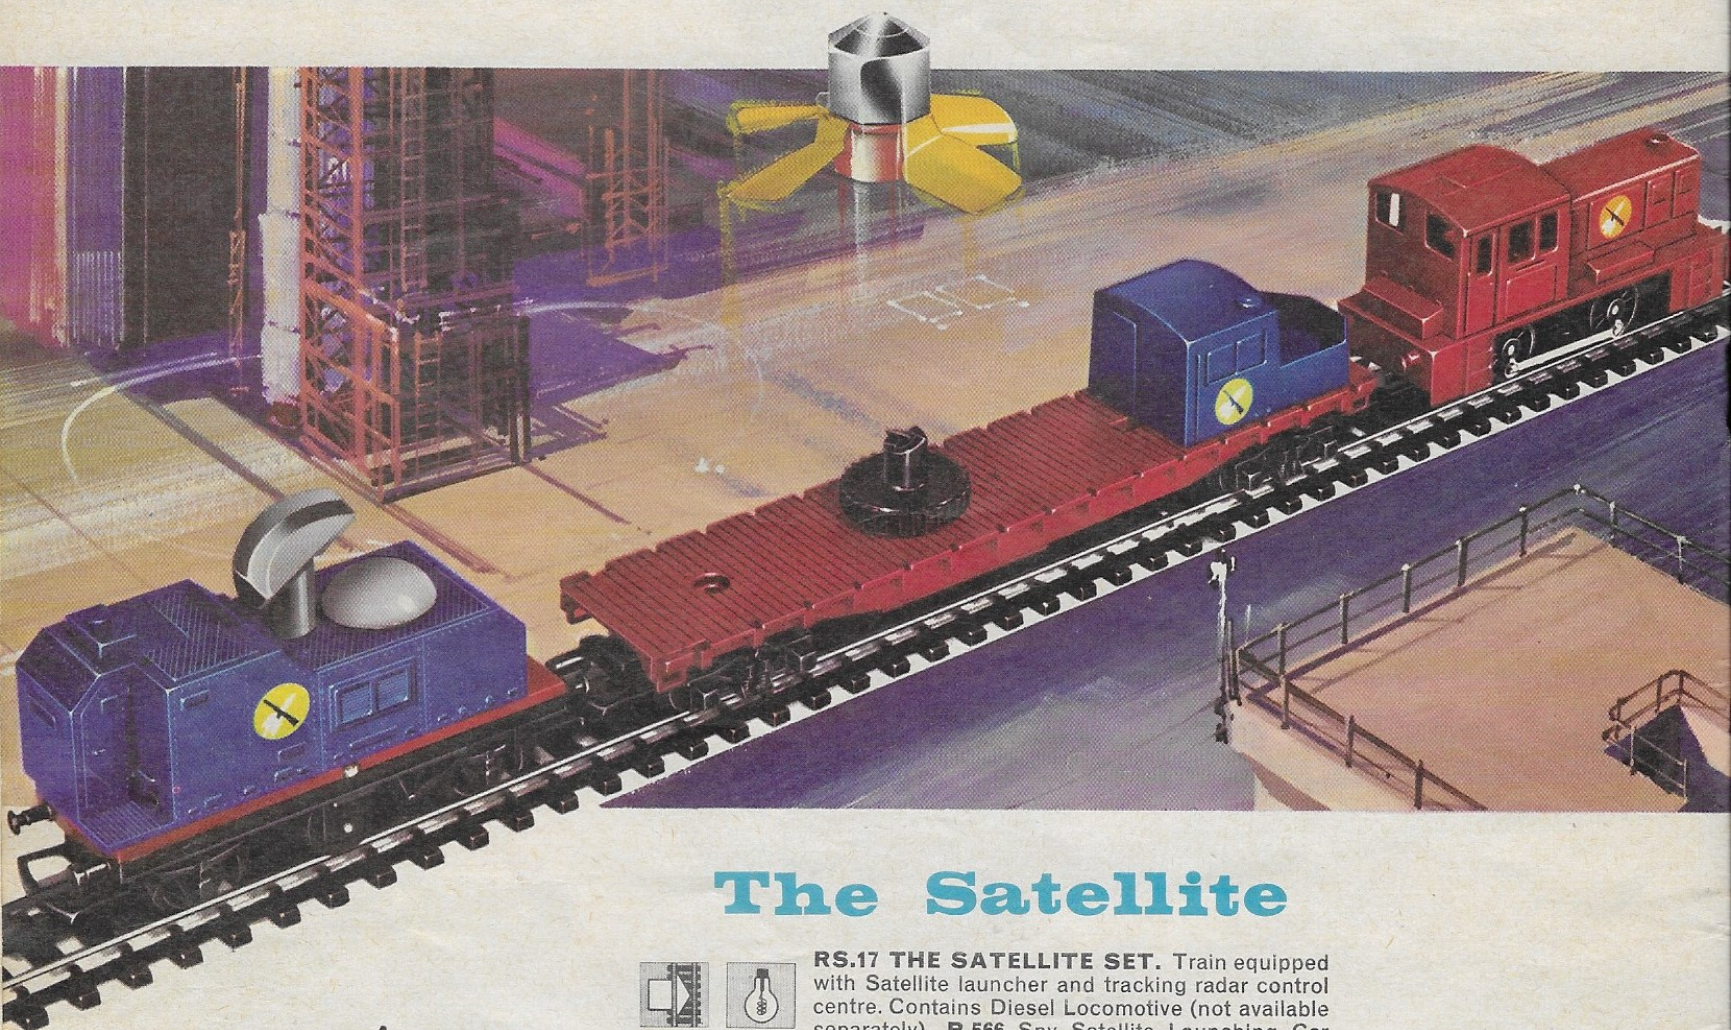

R.249 Exploding Car. Hit this explosive Car with a missile from either Tri-ang Hornby Rocket Launcher and it explodes most realistically. (Caps not included) Easily reassembled to be used over and over again.

Pre wound Helicopter automatically lever. Lever CLIP-FITS to track.

R.216 Tactical Rocket Launcher. Super safe soft nosed rocket and powerful launching ramp.

R.343 Multiple Missile Launcher. Four rockets can be launched singly or simultaneously by hand trigger. Firing tower rotates. Adjustable elevation.

HORNBY
BATTLE SPACE

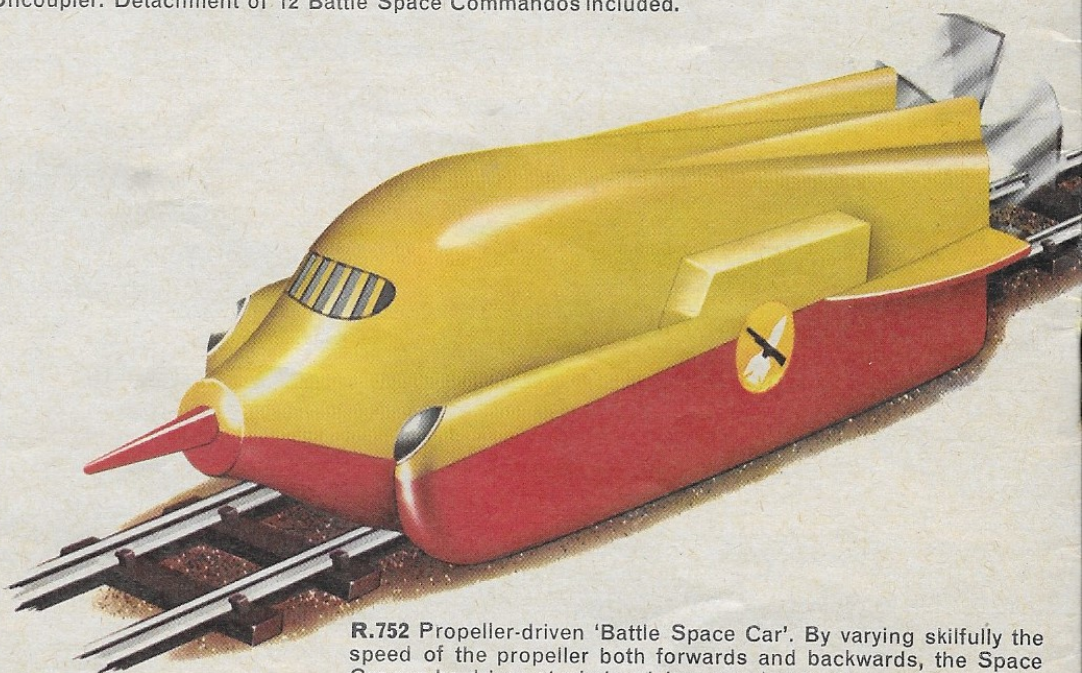

The Satellite

RS.17 THE SATELLITE SET. Train equipped with Satellite launcher and tracking radar control centre. Contains Diesel Locomotive (not available separately), **R.566** Spy Satellite Launching Car off which pre-wound Satellite boosts as Car passes CLIP-FIT trackside trigger, **R.567** Radar Tracking Command Car with revolving scanner and flashing light and Oval of Track with automatic Uncoupler. Detachment of 12 Battle Space Commandos included.

R.164 Battle Space Men. Specially designed to man the Battle Space Units.

R.752 Propeller-driven 'Battle Space Car'. By varying skilfully the speed of the propeller both forwards and backwards, the Space Car can be driven at a hair-raising speed and will negotiate inclines and declines safely.

MODEL-LAND

and

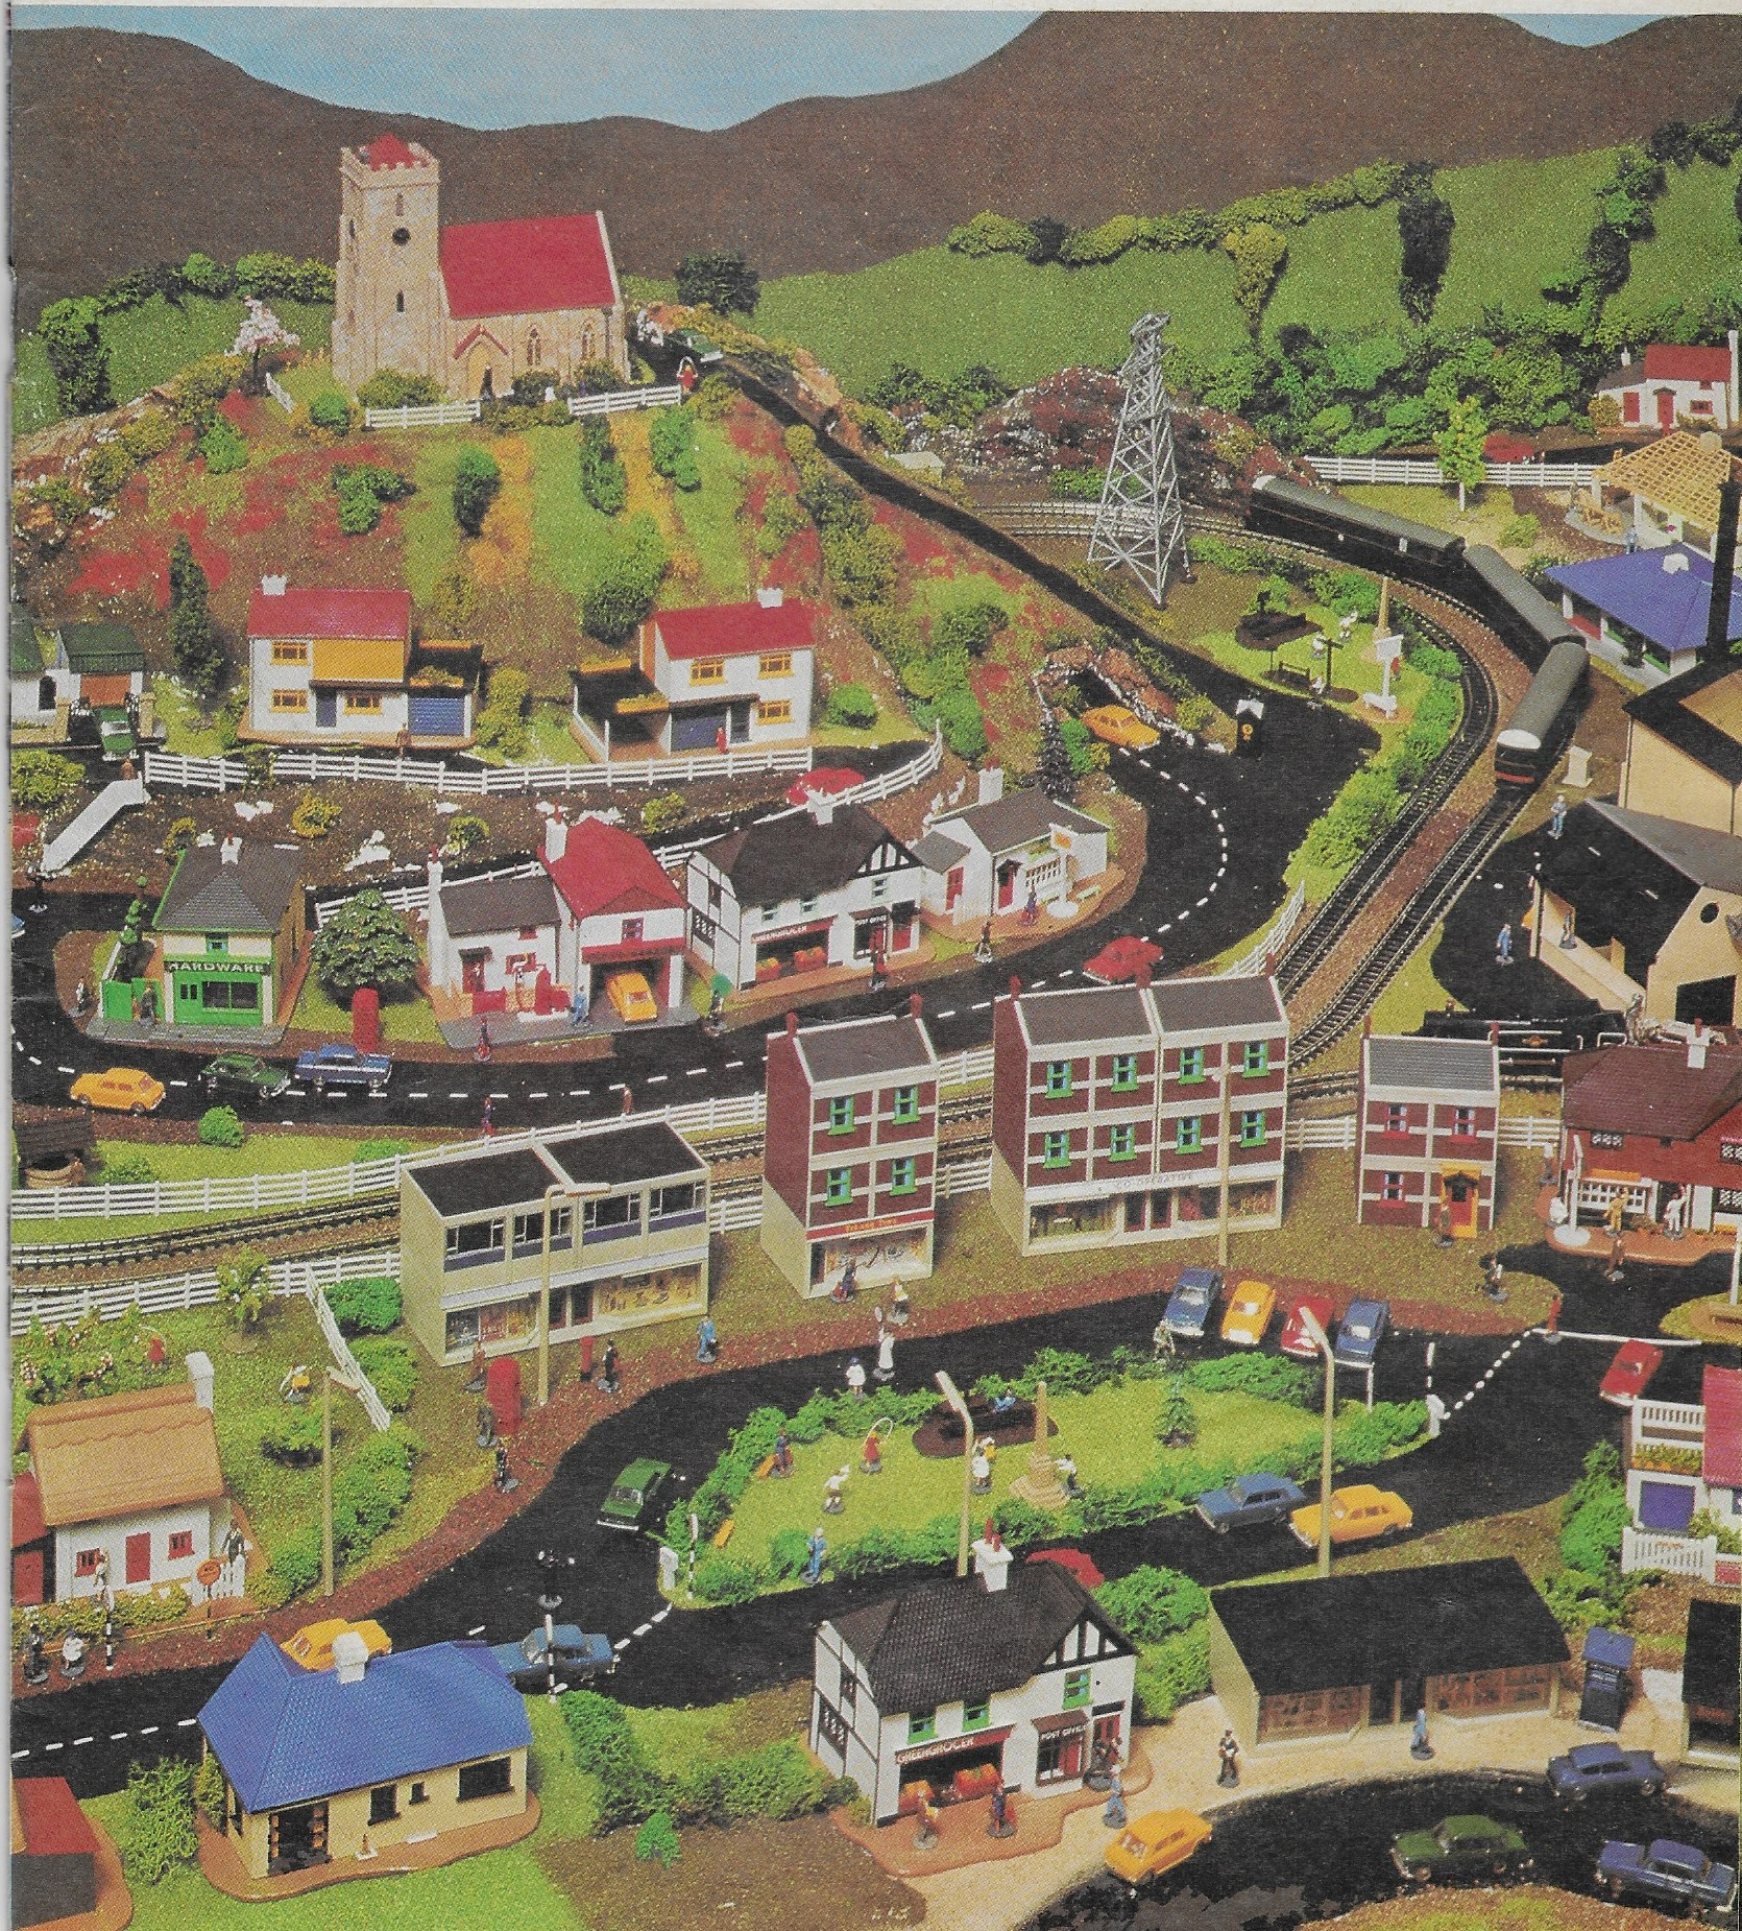

MINIX

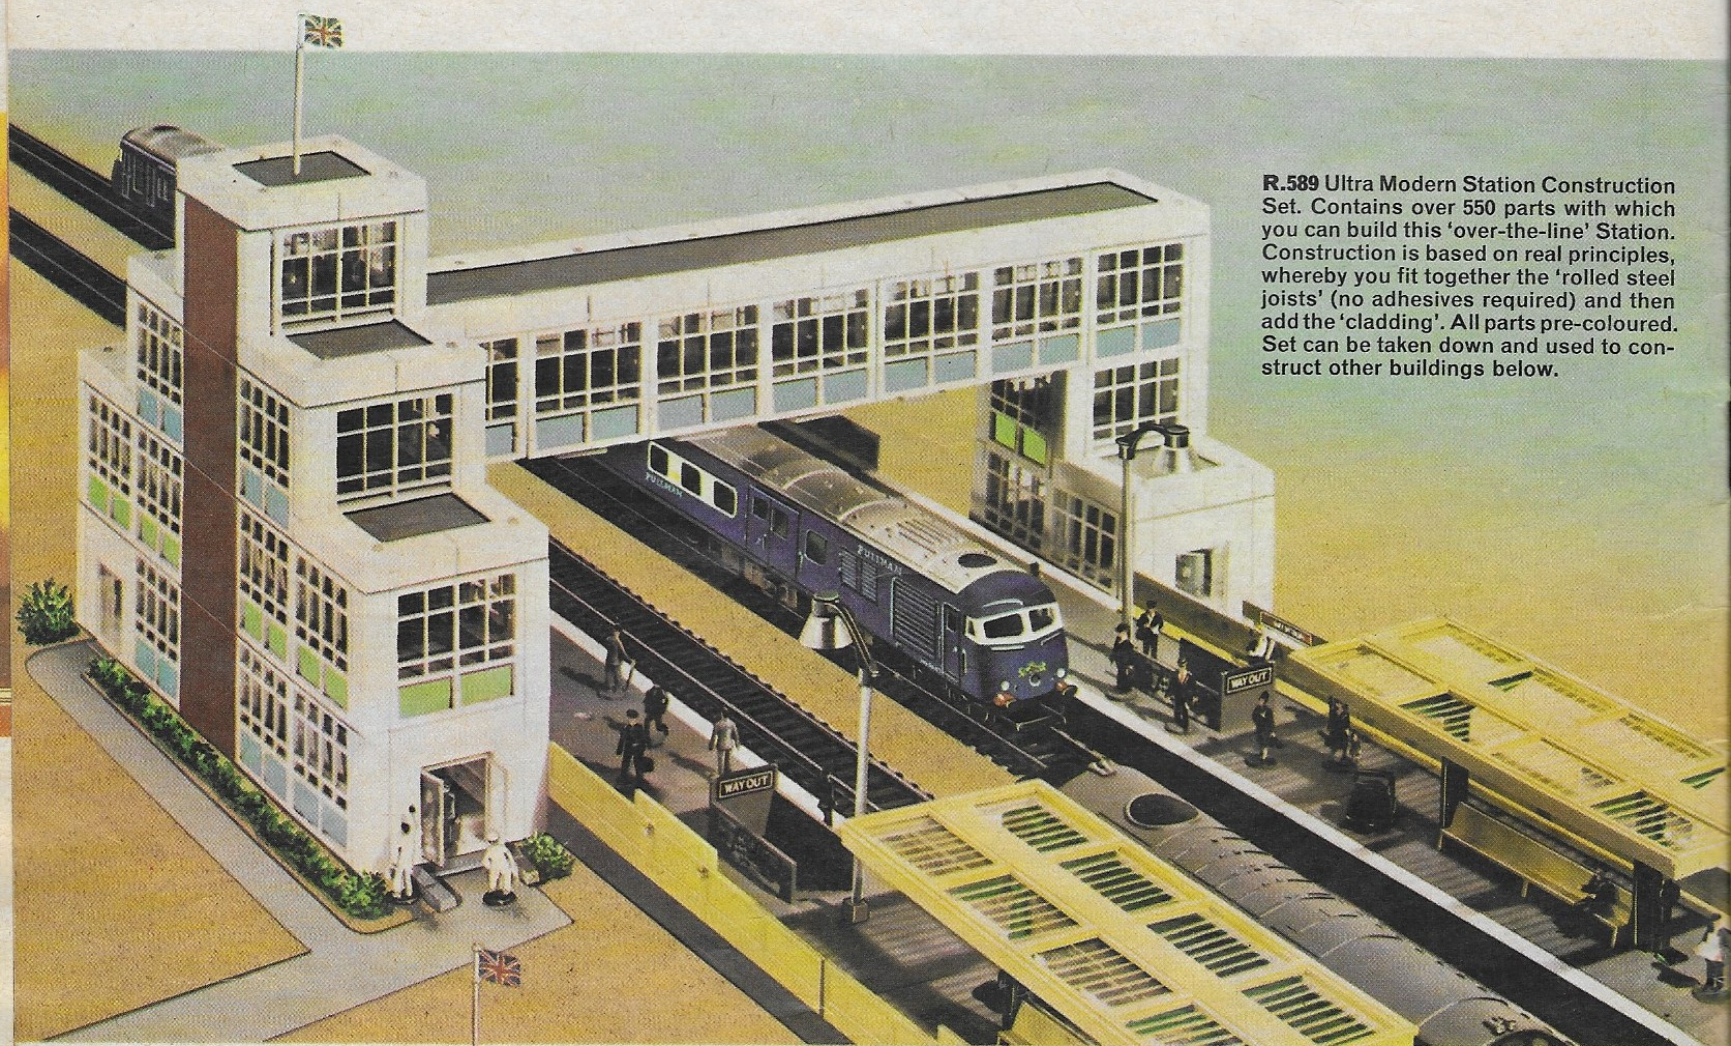

MODEL-LAND Construction Kits are completely pre-coloured. With them you can create the old world charm of an English Village or a modern town with shops and factories. Your Trains need no longer travel aimlessly!

THE GREATEST little CARS IN THE WORLD

MINIX Cars are beautifully detailed and have windows, plated grilles, bumpers and chassis. No wonder they are called **THE GREATEST LITTLE CARS IN THE WORLD**.

See your Dealer for the whole range.

Tri-ang
Regd. Trade Mark
HORNBY
Ultra Modern and

R.589 Ultra Modern Station Construction Set. Contains over 550 parts with which you can build this 'over-the-line' Station. Construction is based on real principles, whereby you fit together the 'rolled steel joists' (no adhesives required) and then add the 'cladding'. All parts pre-coloured. Set can be taken down and used to construct other buildings below.

Railway Administration Tower. Another variation that can be built from Set **R.589**.

This Railway Design Office can be built from Set **R.589** above as an alternative to the 'over-the-line' Station.

Modern Buildings

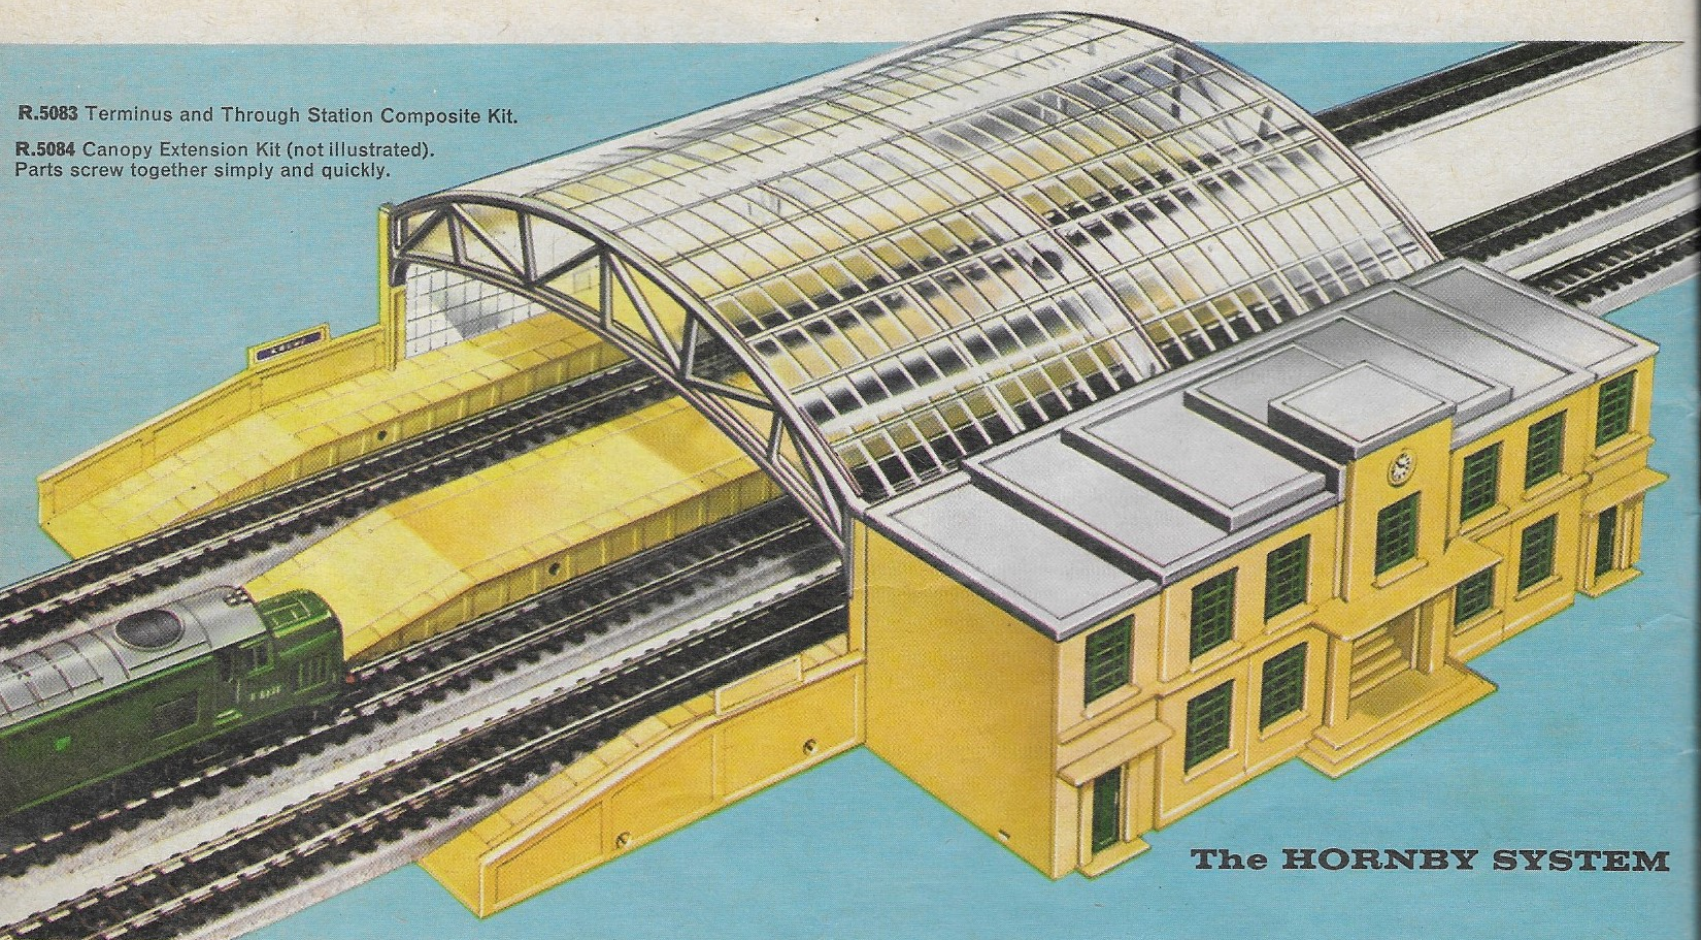

Terminus Station with Locomotive Sheds and Turntable. All this can be constructed, step by step, from Tri-ang Hornby Station Buildings overleaf.

Tri-ang
Regd. Trade Mark
HORNBY

All purpose Station

R.5083 Terminus and Through Station Composite Kit.

R.5084 Canopy Extension Kit (not illustrated).
 Parts screw together simply and quickly.

The HORNBY SYSTEM

R.474 Station Upper-Floor with Clock-tower. Fits above 2 Ticket Offices placed side by side.

R.585 Straight Platform with Canopy and Seat.

R.582 Ticket Office/Platform Pack. Includes Platform Accessories.

R.462 Large Radius Curved Platform.

R.583 Large Radius Curved Platform with Canopy.

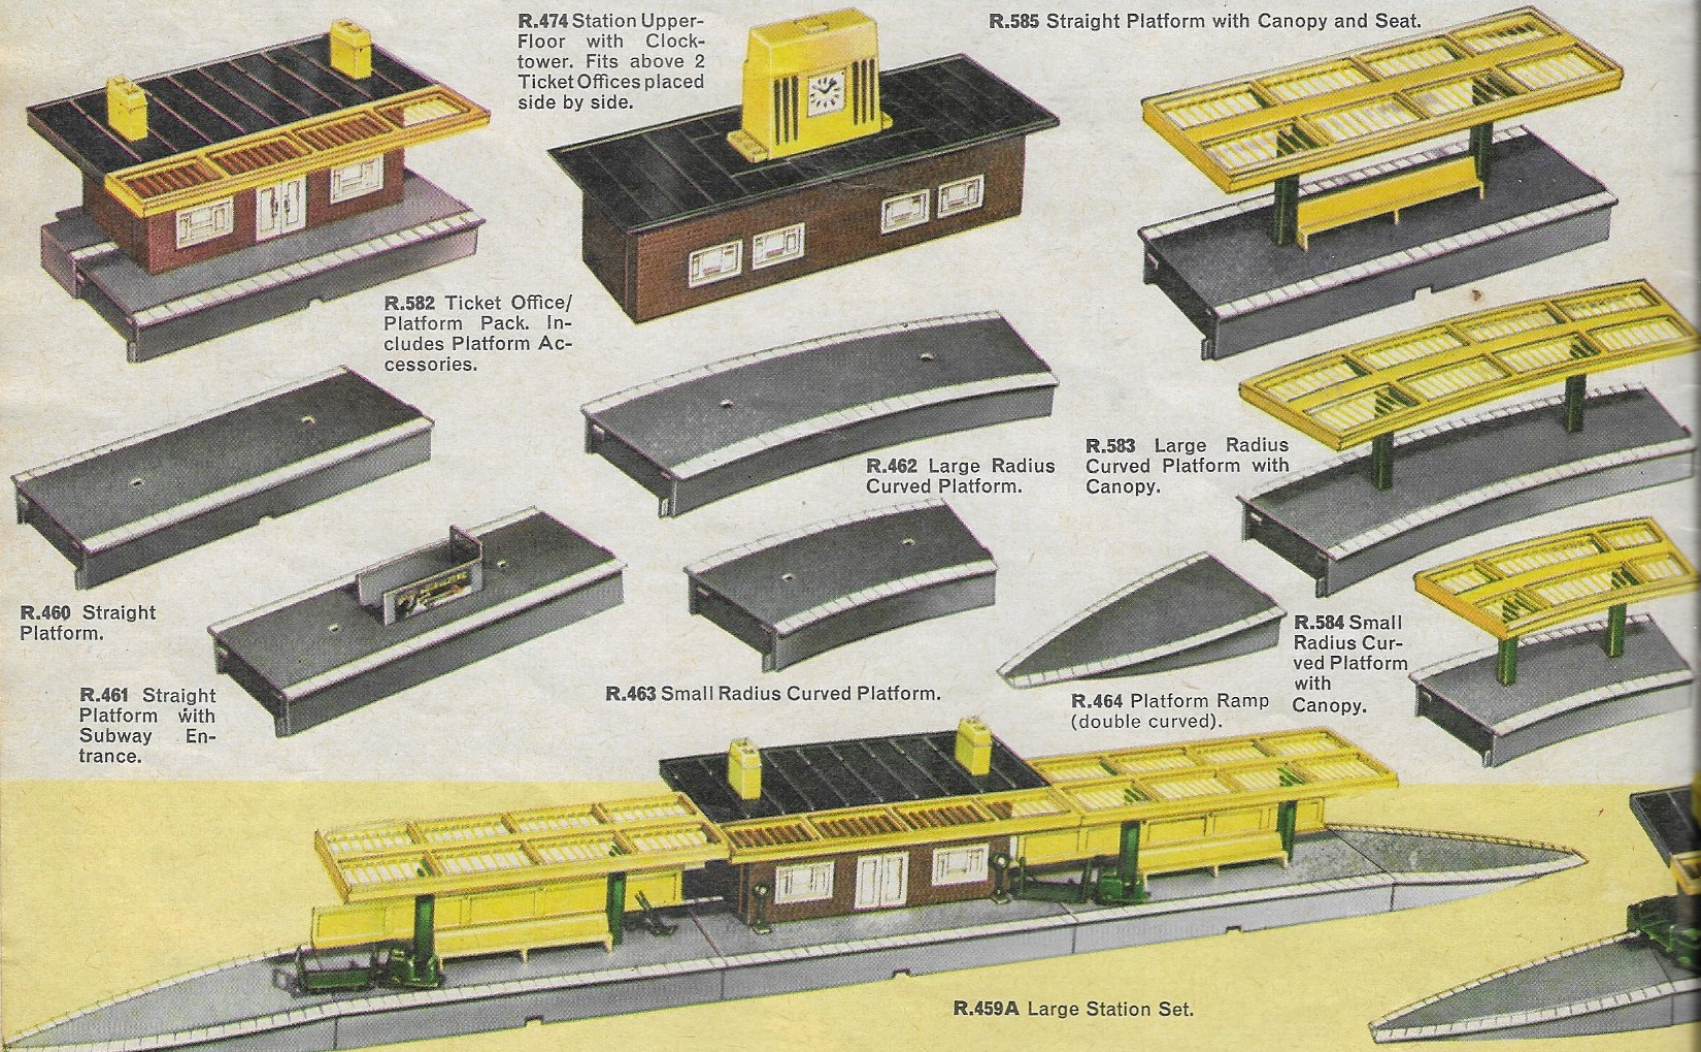

R.584 Small Radius Curved Platform with Canopy.

R.464 Platform Ramp (double curved).

R.463 Small Radius Curved Platform.

R.461 Straight Platform with Subway Entrance.

R.460 Straight Platform.

R.459A Large Station Set.

Buildings

The Hornby System and the Tri-ang System differ in the colour and styling of the platforms and the architecture. Thus it is possible to have two Stations 'down the line' each with its own character. The platforms for the two systems do not fit together.

R.5006 Engine Shed Extension Kit. Converts two-road Shed into four-road (not illustrated).

R.5005 Two-road Engine Shed Kit.

R.5020 Goods Depot Kit with working crane.

R.5030 Island Platform Kit.

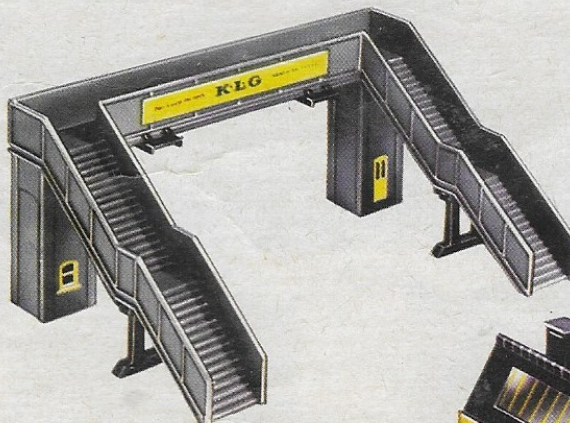

R.5086 Platform Extension.

R.5089 Side Platform Extension.

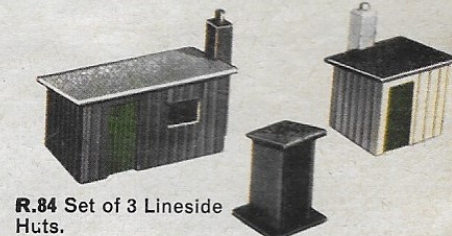

R.5087 Platform Fence. Fits to **R.5086** or **R.5089**.

The TRI-ANG SYSTEM

R.586 Pair of Platform Fences with Nameboards and selection of Station Names.

R.71 Footbridge. Spans double track.

R.84 Set of 3 Lineside Huts.

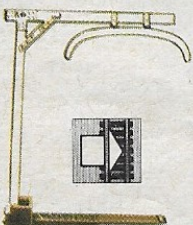

R.146 Modern Engine Shed. Double Track.

R.145 Modern Signal Box with internal fittings.

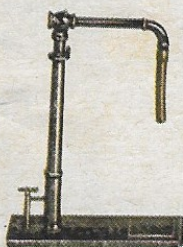

R.283 Set of 5 Platform Figures — Guard, Porter, City Gent, Sitting Man and Sitting Woman.

R.479 Loading Gauge. CLIP-FITS to Track.

R.88 Water Crane.

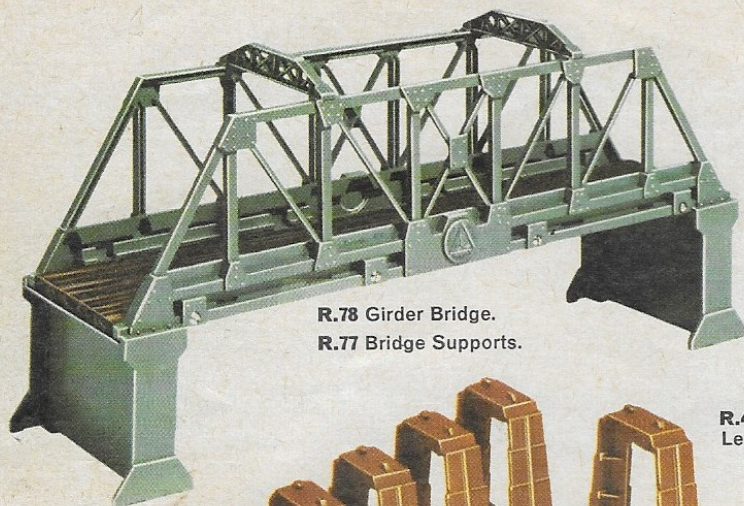

R.458A Small Station Set.

R.588 Island Platform Set.

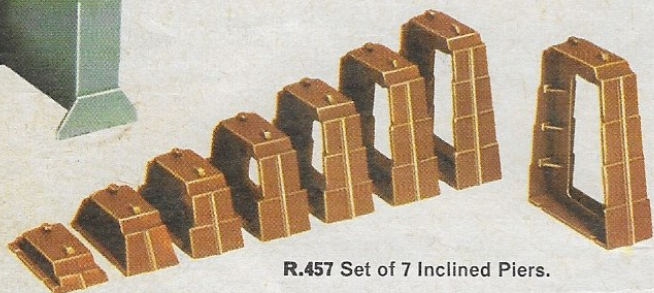

R.78 Girder Bridge.
R.77 Bridge Supports.

R.5015 Girder Bridge.

R.457 Set of 7 Inclined Piers.

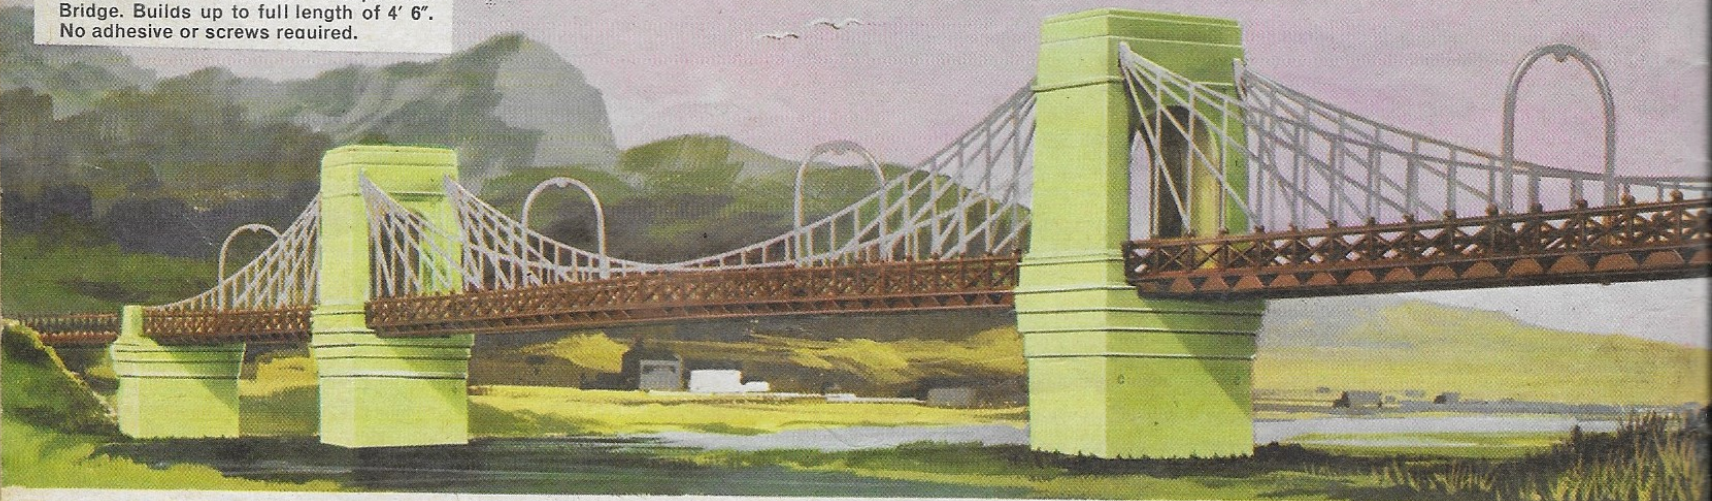

R.453 High Level Pier.

R.430 Small Radius Curved Sidewalls.
R.456 Straight Sidewalls.
R.431 Large Radius Curved Sidewalls.

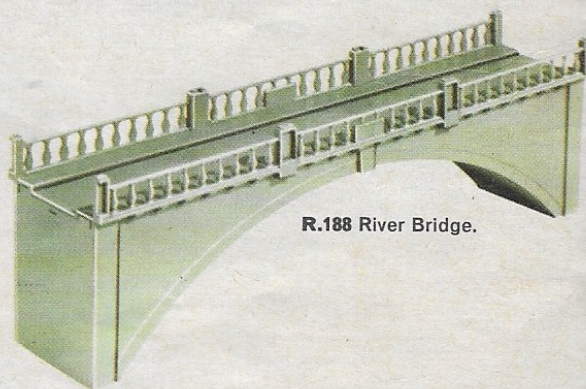

R.264 Grand Victorian Suspension Bridge. Builds up to full length of 4' 6". No adhesive or screws required.

R.180 Viaduct.

R.189 Brick Bridge.

R.188 River Bridge.

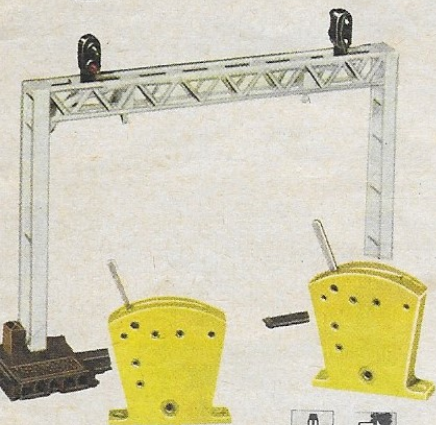

R.5092 Double Track Tunnel.

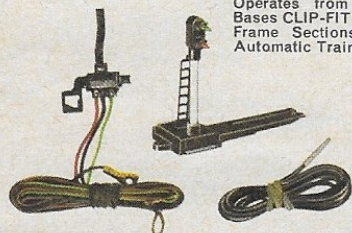

R.576 Single Track Tunnel.

Signals and Catenary

R.573 Colour Light Signal Gantry Set. Operates from 12/15 Volts A.C./D.C. Bases CLIP-FIT to Track. Includes 2 Lever Frame Sections. Can be operated by Automatic Train Control Sets.

R.263L Point operated Signal—Left Hand.
R.263R Point operated Signal—Right Hand. CLIP-FITS to Point and the action of switching the Point automatically changes the Signal.

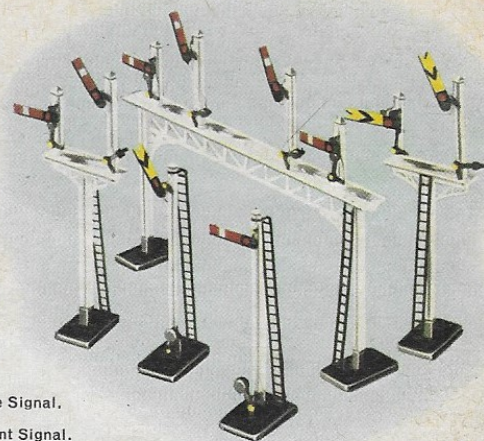

RT.268 Bell Signal Set. Operating from 12/15 Volts A.C./D.C. enables a Train to be passed from one track zone to another using authentic railway bell signalling procedure.

RT.405 Colour Light Signal Set. Changes colour on operation of Lever Frame Section included in Set. 12/15 Volts A.C./D.C. Can be connected to Automatic Train Control Set.

RT.267 Fog Signal. As Train passes hut a 'maroon' is automatically fired. Mechanically operated. Caps not included.

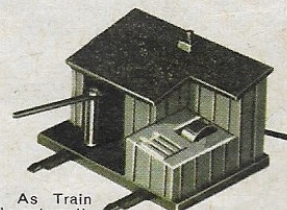

R.43H Home Signal.

R.43D Distant Signal.

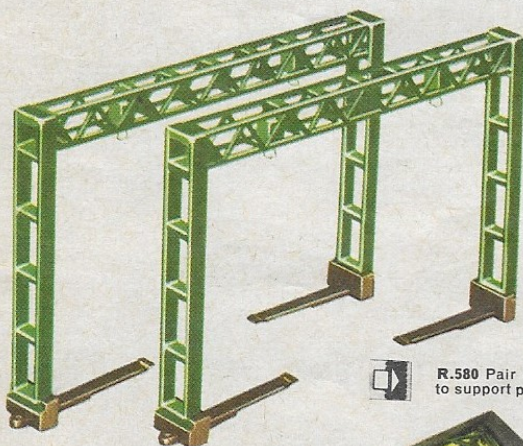

R.140 Signal Gantry.

R.142H Junction Signal—Home.

R.142D Junction Signal—Distant.

The Tri-ang Hornby Overhead Catenary System supplies power to Locomotives with pantographs.

R.580 Pair of Gantries. CLIP-FIT to double tracks to support pairs of Catenary wires above the rails.

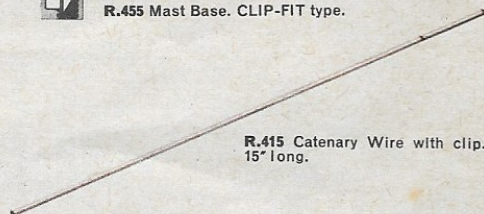

R.419 Single Track Mast.

R.314 Mast Base. Screw fixing type.

R.455 Mast Base. CLIP-FIT type.

R.415 Catenary Wire with clip. 15" long.

R.416 15' Catenary Set. Contains all equipment needed to fit catenary to 15' of straight and curved track.

R.417 10' Catenary Set. Contains all equipment needed to fit catenary to 10' of straight and curved track.

R.418 Catenary Extension Set. Contains equipment to fit catenary to 5' of straight and curved track, a diamond crossing and two points.

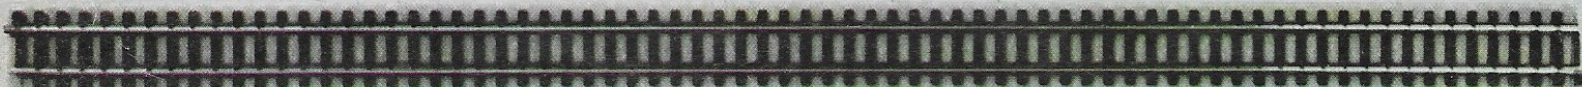

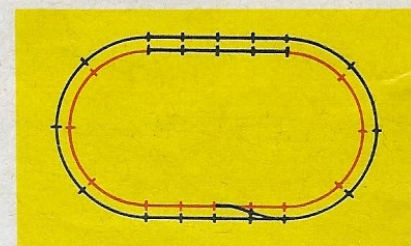

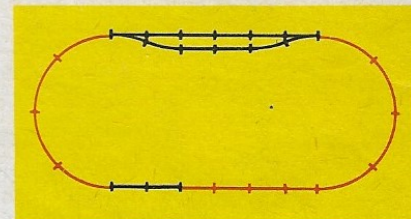

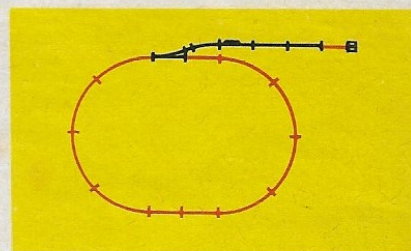

Tri-ang**HORNBY****Super****4****Track and**

R.166 Super 4 Track Plans Book. Shows you how to build up your layout from a basic Train Set. 36 pages of ideas, plans, track geometry, dimensions, prices and wiring diagrams. Invaluable for the beginner, valuable for the expert.

R.454 Siding Set. Contains Point, 3 Straights, Curve L/Rad., Uncoupling, Buffer Stop and Loading Gauge. Illustrated added to a Train Set Oval.

R.439 Passing Loop Set. Contains 2 Points, 8 Straights, 2 Curves L/Rad. Illustrated added to a Train Set Oval.

R.429 Twin Line Conversion Set. Contains 2 Points, 10 Straights, 8 Curves L/Rad. and Power Clip. Illustrated added to a Train Set Oval.

R.489 Long Straight Track. 26 $\frac{3}{4}$ " Long.

R.410 Roll of Plastic Foam Track Underlay for silent running and greater realism. 16' 6" Long. Not illustrated.

R.480 Double Straight Track. 13 $\frac{3}{16}$ " Long.

R.481 Straight Track. 6 $\frac{1}{2}$ " Long.

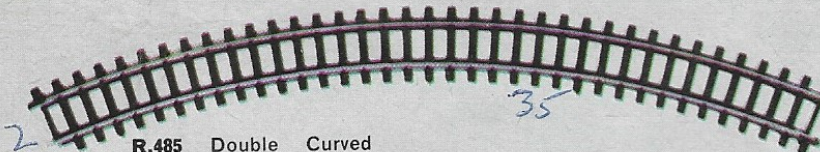

R.476 Tri-ang Hornby Converter Track. 2 $\frac{3}{4}$ " Long. Joins Tri-ang Super 4 to Hornby Dublo 2-Rail Track.

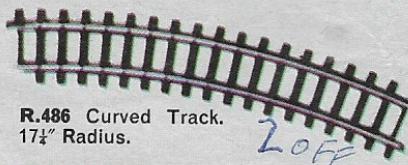

R.497 Isolating Track. 6 $\frac{3}{8}$ " Long.

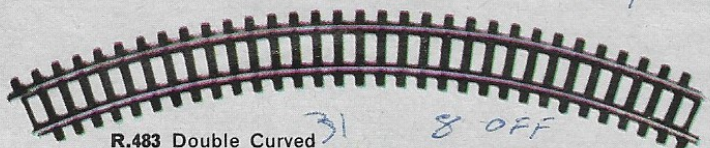

R.482 Quarter Straight Track. 1 $\frac{1}{2}$ " Long.

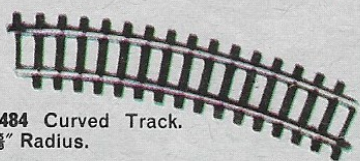

R.485 Double Curved Track. 17 $\frac{1}{2}$ " Radius.

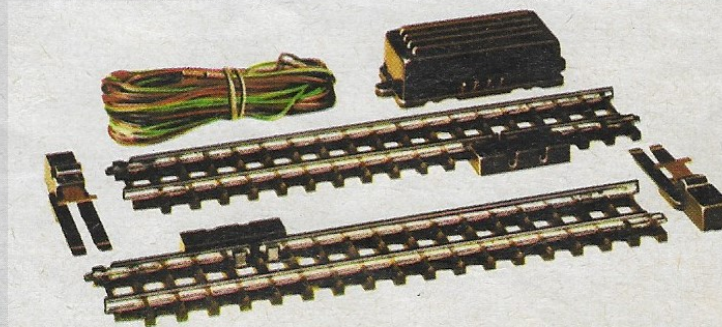

R.486 Curved Track. 17 $\frac{1}{2}$ " Radius.

R.483 Double Curved Track. 14 $\frac{3}{8}$ " Radius.

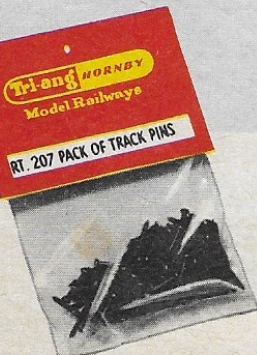

R.484 Curved Track. 14 $\frac{3}{8}$ " Radius.

R.406 Automatic Train Control Set. Automagic! One Train can be made to start and stop another automatically or to control Colour Light Signals. 12 Volts D.C.

Super 4 Track has fully detailed sleepers, solid steel rails and self locking joints. The 'exclusive slot' between the base and the steel rails enables many trackside accessories to CLIP-FIT to the track, thus avoiding their being accidentally knocked over.

RT.207 Packet of Track Pins.

Accessories.

 **R.495** Single Track Level Crossing (Track not included).

R.408 Electrically Operated Turntable. With Control Switch. 12 Volts D.C. Enables Locomotives to be turned round or directed into any of the three track outlets.

R.494 Buffer Stop.

R.496 Double Track Level Crossing (Track not included).

R.414 Double Track Curved Level Crossing (Track not included).

R.299 Trackside Fencing. 2 x 1' Lengths.

R.394 Hydraulic Buffer Stop. With spring-loaded buffers.

RT.266 Pair of Station Lamps. 12/15 Volts A.C./D.C. Fit onto Tri-ang Platforms or CLIP-FIT to Track in Goods Yard.

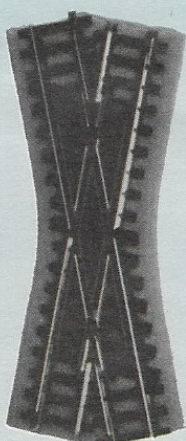

R.587 Trackside Accessory Pack. Contains Mileposts, Gradient Posts and Whistle Signs.

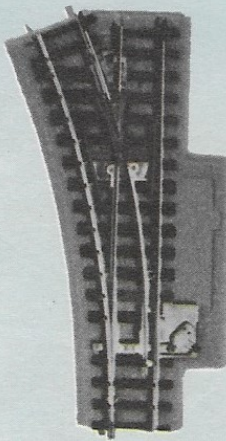

R.493 Right Hand Diamond Crossing.

R.436 Underlay for R.493.

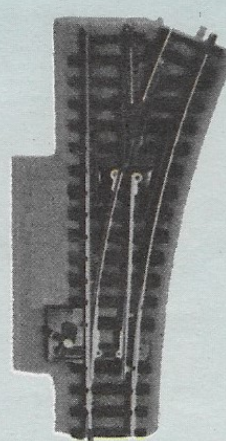

R.492 Left Hand Diamond Crossing.

R.435 Underlay for R.492.

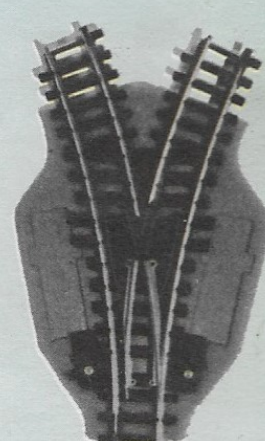

R.490 Left Hand Point.

R.433 Underlay for R.490.

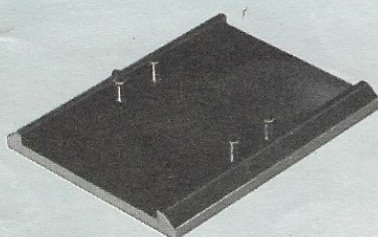

R.491 Right Hand Point.

R.434 Underlay for R.491.

R.437 'Y' Point.

R.438 Underlay for R.437.

RT.144 Base for 6 Lever Frame Sections.

RT.44 Lever Frame Section. Black. To control electrically operated point. Complete with all leads.

RT.47 Lever Frame Section. Green. To control isolating track and station lamps. Complete with all leads.

X.404 Point Motor. Clips to Points and converts them from Hand Operation to Electric Operation. 12/15 Volts A.C./D.C.

R.488 Uncoupling Ramp.

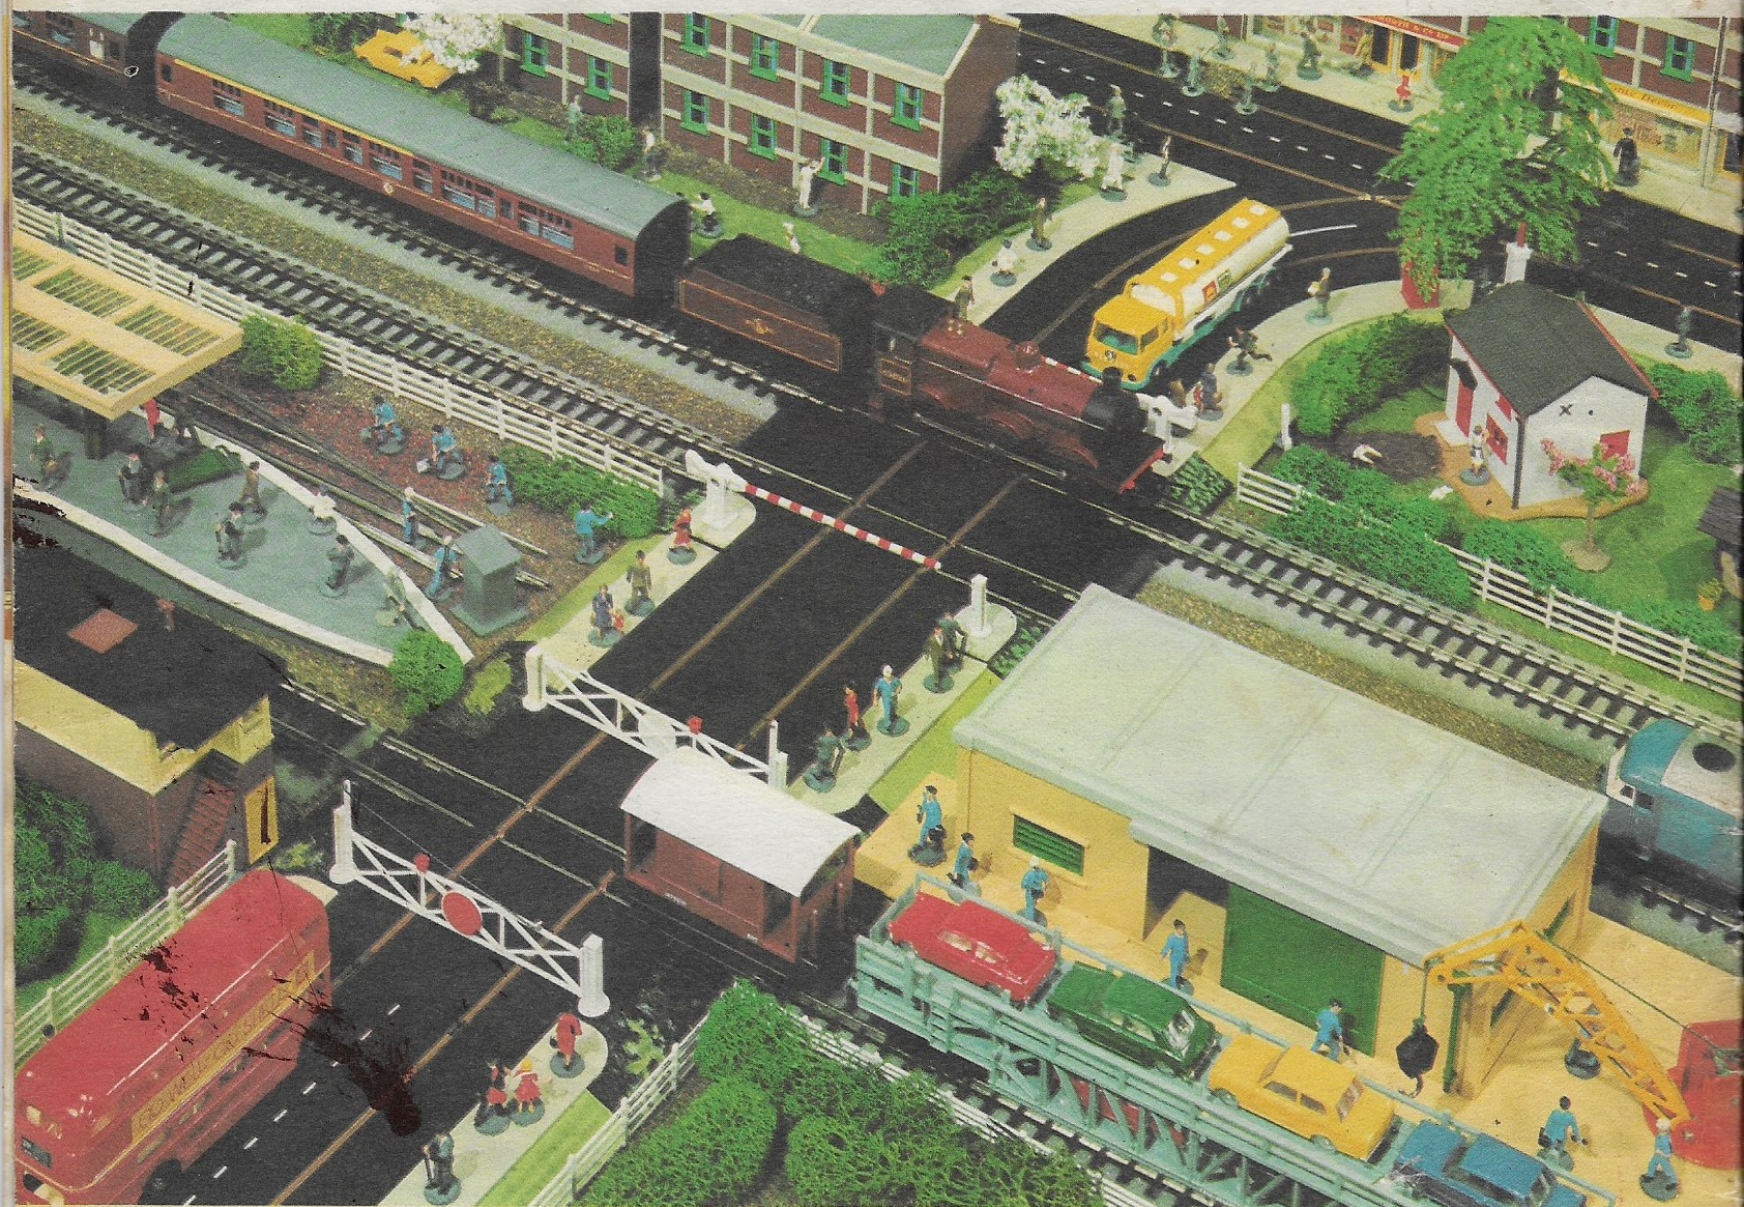

R.487 Power Connecting Clip.

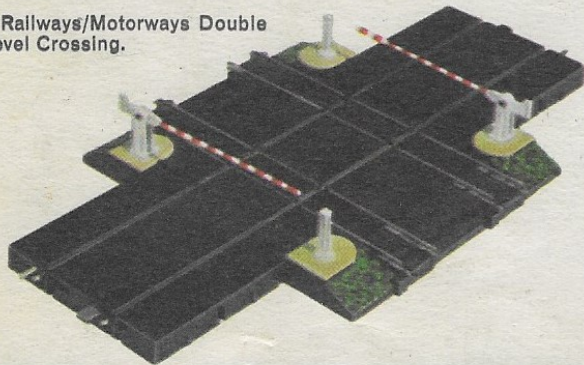

RT.395 Tri-ang Hornby Sounds Record. 7" Extended Play. 45 R.P.M.
